According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025
8.0	24.03.2025	800001001047	Print Date 01.04.2025

---

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Trade name	: IP Extraction Feed
Product code	: X2156
Registration number EU	: 01-2119480190-46-0000, 01-2119480190-46-0001
Synonyms	: Crude C5, Crude C5 Stream, Crude isoprene, Hydrocarbons C5-rich, IP Feed, Isoprene concentrate, Raw C5's

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture	: Chemical intermediate., Raw material for use in the chemical industry., For use as a component in fuel. Please refer to section 16 and/or the annexes for the registered uses under REACH.
------------------------------	---

Uses advised against	: Restricted to professional users., This product must not be used in applications other than the above without first seeking the advice of the supplier.
----------------------	---

This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the supplier.

#### 1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: <b>Shell Chemicals Europe B.V.</b> PO Box 2334 3000 CH Rotterdam Netherlands
Telephone	: +31 (0)10 441 5137 / +31 (0)10 441 5191
Telefax	: +31 (0)20 716 8316 / +31 (0)20 713 9230
Contact for Safety Data Sheet	: sccmsds@shell.com

#### 1.4 Emergency telephone number

+44 (0) 1235 239 670 (This telephone number is available 24 hours per day, 7 days per week)

Giftnotruf (Berlin): +49 (0) 30 3068 6700

---

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

##### Classification (REGULATION (EC) No 1272/2008)

Flammable liquids, Category 1

H224: Extremely flammable liquid and vapour.

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025
8.0	24.03.2025	800001001047	Print Date 01.04.2025

Acute toxicity, Category 4, Oral	H302: Harmful if swallowed.
Aspiration hazard, Category 1	H304: May be fatal if swallowed and enters airways.
Acute toxicity, Category 4, Dermal	H312: Harmful in contact with skin.
Skin irritation, Category 2	H315: Causes skin irritation.
Eye irritation, Category 2	H319: Causes serious eye irritation.
Specific target organ toxicity - single exposure, Category 3	H335: May cause respiratory irritation. H336: May cause drowsiness or dizziness.
Germ cell mutagenicity, Category 2	H341: Suspected of causing genetic defects.
Carcinogenicity, Category 1B	H350: May cause cancer.
Reproductive toxicity, Category 2	H361: Suspected of damaging fertility or the unborn child.
Long-term (chronic) aquatic hazard, Category 2	H411: Toxic to aquatic life with long lasting effects.

### 2.2 Label elements

#### Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal word : Danger

Hazard statements :

	PHYSICAL HAZARDS:
H224	Extremely flammable liquid and vapour.
	HEALTH HAZARDS:
H302	Harmful if swallowed.
H304	May be fatal if swallowed and enters airways.
H312	Harmful in contact with skin.
H315	Causes skin irritation.
H319	Causes serious eye irritation.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H341	Suspected of causing genetic defects.
H350	May cause cancer.
H361	Suspected of damaging fertility or the unborn child.
	ENVIRONMENTAL HAZARDS:
H411	Toxic to aquatic life with long lasting effects.

Precautionary statements : **Prevention:**

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version 8.0      Revision Date: 24.03.2025      SDS Number: 800001001047      Date of last issue: 23.01.2025  
Print Date 01.04.2025

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
P243 Take action to prevent static discharges.  
P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.  
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

### Response:

P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor.

P302 + P352 IF ON SKIN: Wash with plenty of water and soap.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P331 Do NOT induce vomiting.

### Storage:

No precautionary phrases.

### Disposal:

No precautionary phrases.

## 2.3 Other hazards

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

This material is a static accumulator.

Even with proper grounding and bonding, this material can still accumulate an electrostatic charge.

If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur.

The vapour is heavier than air, spreads along the ground and distant ignition is possible.

Will float and can be reignited on surface water.

## SECTION 3: Composition/information on ingredients

### 3.1 Substances

#### Components

Chemical name	CAS-No. EC-No. Index-No. Registration number	Classification	Concentration (% w/w)

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

General advice : Not expected to be a health hazard when used under normal conditions.

Protection of first-aiders : When administering first aid, ensure that you are wearing the

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025
8.0	24.03.2025	800001001047	Print Date 01.04.2025

appropriate personal protective equipment according to the incident, injury and surroundings.

- |                         |   |
|-------------------------|---|
| If inhaled              | : Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.  |
| In case of skin contact | : Remove contaminated clothing. Immediately flush skin with large amounts of water for at least 15 minutes, and follow by washing with soap and water if available. If redness, swelling, pain and/or blisters occur, transport to the nearest medical facility for additional treatment.   |
| In case of eye contact  | : Immediately flush eye(s) with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Transport to the nearest medical facility for additional treatment.  |
| If swallowed            | : Call emergency number for your location / facility. If swallowed, do not induce vomiting: transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing. Rinse mouth. |

### 4.2 Most important symptoms and effects, both acute and delayed

- |          |  |
|----------|--|
| Symptoms | : Respiratory irritation signs and symptoms may include a temporary burning sensation of the nose and throat, coughing, and/or difficulty breathing.<br>Breathing of high vapour concentrations may cause central nervous system (CNS) depression resulting in dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death.<br><br>Skin irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blisters.<br><br>Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision.<br><br>Ingestion may result in nausea, vomiting and/or diarrhoea. If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath, and/or fever. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing. |
|----------|--|

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025
8.0	24.03.2025	800001001047	Print Date 01.04.2025

---

Damage to blood-forming organs may be evidenced by: a) fatigue and anaemia (RBC), b) decreased resistance to infection, and/or excessive bruising and bleeding (platelet effect). Heart damage may be evidenced by shortness of breath and, in severe cases, by collapse (cardiac arrest).

### 4.3 Indication of any immediate medical attention and special treatment needed

Treatment	: IMMEDIATE TREATMENT IS EXTREMELY IMPORTANT! Call a doctor or poison control center for guidance. Potential for chemical pneumonitis. Treat symptomatically. Artificial respiration and/or oxygen may be necessary.
-----------	--

---

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

Suitable extinguishing media	: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	: Do not use water in a jet.

### 5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting	: Carbon monoxide may be evolved if incomplete combustion occurs. Will float and can be reignited on surface water. The vapour is heavier than air, spreads along the ground and distant ignition is possible. Flammable vapours may be present even at temperatures below the flash point.
--------------------------------------	--

### 5.3 Advice for firefighters

Special protective equipment for firefighters	: Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).
Specific extinguishing methods	: Standard procedure for chemical fires.
Further information	: Clear fire area of all non-emergency personnel. Keep adjacent containers cool by spraying with water.

### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions :

- Observe all relevant local and international regulations.
- Notify authorities if any exposure to the general public or the environment occurs or is likely to occur.
- Local authorities should be advised if significant spillages cannot be contained.
- 6.1.1 For non emergency personnel:
  - Avoid contact with skin, eyes and clothing.
  - Isolate hazard area and deny entry to unnecessary or unprotected personnel.
  - Do not breathe fumes, vapour.
  - Do not operate electrical equipment.
- 6.1.2 For emergency responders:
  - Avoid contact with skin, eyes and clothing.
  - Isolate hazard area and deny entry to unnecessary or unprotected personnel.
  - Do not breathe fumes, vapour.
  - Do not operate electrical equipment.

#### 6.2 Environmental precautions

Environmental precautions :

- Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment to avoid environmental contamination.
- Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapour or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment.

#### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up :

- For small liquid spills (< 1 drum), transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.
- For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

#### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., Risk of explosion. Inform the emergency services if liquid enters surface water drains., For guidance

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025
8.0	24.03.2025	800001001047	Print Date 01.04.2025

on disposal of spilled material see Section 13 of this Safety Data Sheet., Vapour may form an explosive mixture with air.  
Local authorities should be advised if significant spillages cannot be contained.

### SECTION 7: Handling and storage

#### 7.1 Precautions for safe handling

- |                         |  |
|-------------------------|--|
| Technical measures      | :<br>Avoid breathing of or direct contact with material. Only use in well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet.<br>Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.<br>Ensure that all local regulations regarding handling and storage facilities are followed.   |
| Advice on safe handling | :<br>Avoid inhaling vapour and/or mists.<br>Avoid contact with skin, eyes and clothing.<br>Extinguish any naked flames. Do not smoke. Remove ignition sources. Avoid sparks.<br>The vapour is heavier than air. Beware of accumulation in pits and confined spaces.<br>Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.<br>Bulk storage tanks should be diked (bunded).<br>Properly dispose of any contaminated rags or cleaning materials in order to prevent fires.<br>Even with proper grounding and bonding, this material can still accumulate an electrostatic charge.<br>If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur.<br>Be aware of handling operations that may give rise to additional hazards that result from the accumulation of static charges.<br>These include but are not limited to pumping (especially turbulent flow), mixing, filtering, splash filling, cleaning and filling of tanks and containers, sampling, switch loading, gauging, vacuum truck operations, and mechanical movements.<br>These activities may lead to static discharge e.g. spark formation.<br>Restrict line velocity during pumping in order to avoid generation of electrostatic discharge ( $\leq 1$ m/s until fill pipe submerged to twice its diameter, then $\leq 7$ m/s). Avoid splash filling.<br>Do NOT use compressed air for filling, discharging, or handling operations.<br>Inhibitor levels should be maintained.<br>Protect against light. |
| Product Transfer        | :<br>If positive displacement pumps are used, these must be fitted   |

---

with a non-integral pressure relief valve. Refer to guidance under Handling section.

Hygiene measures : Wash hands before eating, drinking, smoking and using the toilet. Launder contaminated clothing before re-use.

### 7.2 Conditions for safe storage, including any incompatibilities

Storage class (TRGS 510) : 3, Flammable liquids

Further information on storage stability : Keep away from aerosols, flammables, oxidizing agents, corrosives and from other flammable products which are not harmful or toxic to man or to the environment.  
Must be stored in a diked (bunded) well-ventilated area, away from sunlight, ignition sources and other sources of heat.  
Must be kept inhibited during storage and shipment as material can polymerise.  
Vapours from tanks should not be released to atmosphere.  
Breathing losses during storage should be controlled by a suitable vapour treatment system.  
Nitrogen blanket recommended.  
Electrostatic charges will be generated during pumping.  
Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment to reduce the risk.  
The vapours in the head space of the storage vessel may lie in the flammable/explosive range and hence may be flammable.  
Reacts with atmospheric oxygen. Material contains a stabilizer to inhibit oxidative colour change.  
Prolonged storage of the product can cause the stabiliser to lose its effectiveness.  
The product is normally supplied in a stabilized form. If the permissible storage period and/or storage temperature is noticeably exceeded, the product may polymerise with heat evolution.

Packaging material : Suitable material: For containers, or container linings use mild steel, stainless steel.  
Unsuitable material: Copper., Copper alloys.

### 7.3 Specific end use(s)

Specific use(s) : Please refer to section 16 and/or the annexes for the registered uses under REACH.

See additional references that provide safe handling practices for liquids that are determined to be static accumulators:  
American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or  
National Fire Protection Agency 77 (Recommended Practices on Static Electricity).

1,3-butadiene	106-99-0	3,4-dihydroxybutylmercapturic acid (DHBMA): 2900 µg/g creatinine (Urine)	shift Equivalence Value for Tolerable concentration: end of exposure or end of shift, Equivalence Value for Tolerable concentration: with long-term exposure: at the end of the shift after several previous shifts	TRGS 910
		3,4-dihydroxybutylmercapturic acid (DHBMA): 600 µg/g creatinine (Urine)	Equivalence Value for Acceptance concentration: end of exposure or end of shift, Equivalence Value for Acceptance concentration: with long-term exposure: at the end of the shift after several previous shifts	TRGS 910
		2-hydroxy-3-butenylmercapturic acid (MHBMA): 80 µg/g creatinine (Urine)	Equivalence Value for Tolerable concentration: end of exposure or end of shift, Equivalence Value for Tolerable concentration: with long-term exposure: at the end of the shift after several previous shifts	TRGS 910
		2-hydroxy-3-butenylmercapturic acid (MHBMA): 10 µg/g creatinine (Urine)	Equivalence Value for Acceptance concentration: end of exposure or end of shift, Equivalence Value for Acceptance concentration: with long-term exposure: at the end of the shift after several previous shifts	TRGS 910

### Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End Use	Exposure routes	Potential health effects	Value
IP Extraction Feed	Workers	Dermal	Long-term systemic	0,34 mg/kg

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version 8.0      Revision Date: 24.03.2025      SDS Number: 800001001047      Date of last issue: 23.01.2025  
Print Date 01.04.2025

IP Extraction Feed	Workers	Inhalation	effects Long-term systemic effects	bw/day 8,4 mg/m3
--------------------	---------	------------	---------------------------------------	---------------------

### Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

Substance name	Environmental Compartment	Value
Remarks:	Substance is a hydrocarbon with a complex, unknown or variable composition. Conventional methods of deriving PNECs are not appropriate and it is not possible to identify a single representative PNEC for such substances.	

## 8.2 Exposure controls

### Engineering measures

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex.

Use sealed systems as far as possible.

Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits.

Local exhaust ventilation is recommended.

Eye washes and showers for emergency use.

Firewater monitors and deluge systems are recommended.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

#### General Information

Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when there is potential for inhalation; clear up spills immediately and dispose of wastes safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.

### Personal protective equipment

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex.

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection : Wear goggles for use against liquids and gas.  
Wear full face shield if splashes are likely to occur.  
Approved to EU Standard EN166.

Hand protection

Remarks : Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374,

# SAFETY DATA SHEET

## IP Extraction Feed

Version 8.0	Revision Date: 24.03.2025	SDS Number: 800001001047	Date of last issue: 23.01.2025 Print Date 01.04.2025
----------------	------------------------------	-----------------------------	---

US: F739) made from the following materials may provide suitable chemical protection. Longer term protection: Viton. Incidental contact/Splash protection: Nitrile rubber gloves. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

- Skin and body protection : Wear chemical and cold resistant gloves/gauntlets, and boots, and apron.  
Protective clothing approved to EU Standard EN14605.
- Respiratory protection : If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus.  
Where air-filtering respirators are suitable, select an appropriate combination of mask and filter.  
If air-filtering respirators are suitable for conditions of use: Select a filter suitable for organic gases and vapours [Type AX boiling point < 65°C (149°F)] meeting EN14387.
- Thermal hazards : Not applicable

## SECTION 9: Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

Physical state : Liquid.

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025

Colour : Colourless to light coloured

Odour : strong

Odour Threshold : not determined

Melting point/freezing point : Data not available

Boiling point/boiling range : 34 - 60 °C

### Flammability

Flammability (solid, gas) : Data not available

### Lower explosion limit and upper explosion limit / flammability limit

Upper explosion limit /  
Upper flammability limit : 12 %(V)

Lower explosion limit /  
Lower flammability limit : 1 %(V)

Flash point : < -20 °C

Auto-ignition temperature : > 200 °C

Decomposition temperature  
Decomposition temperature : Data not available

pH : Data not available

### Viscosity

Viscosity, dynamic : Typical 0,25 mPa.s (0 °C)  
Method: ASTM D445  
  
Typical 0,22 mPa.s (20 °C)  
Method: ASTM D445

Viscosity, kinematic : Data not available

### Solubility(ies)

Water solubility : insoluble

Solubility in other solvents : Data not available

Partition coefficient: n-  
octanol/water : Data not available

Data not available

Vapour pressure : 58,4 kPa (20 °C)

# SAFETY DATA SHEET

Relative density : 0,7 (20,0 °C)  
Method: ASTM D4052

Density : 678 kg/m<sup>3</sup> (20 °C)  
Method: ASTM D4052

Relative vapour density : 2,3

Particle characteristics  
Particle size : Data not available

### 9.2 Other information

Explosive properties : Classification Code: Not classified

Oxidizing properties : Data not available

Evaporation rate : Data not available

Conductivity : Low conductivity: < 100 pS/m

The conductivity of this material makes it a static accumulator., A liquid is typically considered nonconductive if its conductivity is below 100 pS/m and is considered semi-conductive if its conductivity is below 10,000 pS/m., Whether a liquid is nonconductive or semi-conductive, the precautions are the same., A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can greatly influence the conductivity of a liquid

Surface tension : Data not available

Molecular weight : Data not available

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

Prolonged exposure to air may lead to peroxide formation.  
Reacts with strong oxidising agents.

### 10.2 Chemical stability

The product is normally supplied in a stabilized form. If the permissible storage period and/or storage temperature is noticeably exceeded, the product may polymerise with heat evolution.  
Reacts violently with:  
Nitric, sulphuric and chlorosulphuric acids.  
Oxidises on contact with air to form unstable peroxides.  
Polymerisation may occur at elevated temperatures.  
Normally stable under ambient conditions and if properly inhibited.

### 10.3 Possibility of hazardous reactions

Hazardous reactions : Normally stable under ambient conditions and if properly in-

# SAFETY DATA SHEET

8.0	24.03.2025	800001001047	Print Date 01.04.2025

hibited.

### 10.4 Conditions to avoid

Conditions to avoid : Heat, flames, and sparks.  
Exposure to air.  
Exposure to sunlight.  
In certain circumstances product can ignite due to static electricity.

### 10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.  
Strong acids.  
Strong bases.  
Copper alloys

### 10.6 Hazardous decomposition products

Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases, including carbon monoxide, carbon dioxide and other organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

## SECTION 11: Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Information on likely routes of exposure : Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.

#### Acute toxicity

##### Product:

Acute oral toxicity : LD50 (Rat, male and female): > 300 - 2.000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Harmful if swallowed.

Acute inhalation toxicity : Remarks: May be harmful if inhaled.

Acute dermal toxicity : LD50 (Rabbit, male): 1.183 mg/kg  
Method: Literature data  
Remarks: Harmful in contact with skin.

##### Components:

##### **Hydrocarbons, C5-rich:**

Acute oral toxicity : LD 50 (Rat, male and female): >300 <=2000 mg/kg

# SAFETY DATA SHEET

Method: Test(s) equivalent or similar to OECD Test Guideline 401

Remarks: Harmful if swallowed.

Acute inhalation toxicity : LC 50 (Rat, male and female): > 20 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD 50 (Rabbit, male): 1.183 mg/kg  
Method: Literature data  
Remarks: Harmful in contact with skin.

### Skin corrosion/irritation

#### Product:

Species : Rabbit  
Method : Literature data  
Remarks : Harmful in contact with skin.

#### Components:

##### Hydrocarbons, C5-rich:

Species : Rabbit  
Method : OECD Test Guideline 404  
Remarks : Causes skin irritation.

### Serious eye damage/eye irritation

#### Product:

Species : Rabbit  
Method : Literature data  
Remarks : Causes serious eye irritation.

#### Components:

##### Hydrocarbons, C5-rich:

Species : Rabbit  
Method : Literature data  
Remarks : Causes serious eye irritation.

### Respiratory or skin sensitisation

#### Product:

Species : Guinea pig  
Method : Test(s) equivalent or similar to OECD Test Guideline 406  
Remarks : Based on available data, the classification criteria are not met.

## 14.6 Special precautions for user

Remarks	:	Special Precautions: Refer to Section 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.
---------	---	--

## 14.7 Maritime transport in bulk according to IMO instruments

Pollution category	:	Y
Ship type	:	2
Product name	:	IP Extraction Feed (contains Isoprene; 1,3-Cyclopentadiene dimer (molten))

<b>Additional Information</b>	:	This product may be transported under nitrogen blanketing. Nitrogen is an odourless and invisible gas. Exposure to nitrogen may cause asphyxiation or death. Personnel must observe strict safety precautions when involved with a confined space entry.
-------------------------------	---	--

Transport in bulk according to Annex II of Marpol and the IBC Code

### SECTION 15: Regulatory information

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

- |  |   |  |
|--|---|--|
| REACH - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles (Annex XVII) | : | Conditions of restriction for the following entries should be considered: Hydrocarbons, C5-rich (Number on list 29, 28)<br>Isoprene (Number on list 28)<br>1,3-butadiene (Number on list 29, 28)<br>Benzene (Number on list 72, 5, 29, 28) |
| REACH - List of substances subject to authorisation (Annex XIV)  | : | Product is not subject to Authorisation under REACH.   |
| REACH - Candidate List of Substances of Very High Concern for Authorisation (Article 59).  | : | This product does not contain substances of very high concern (Regulation (EC) No 1907/2006 (REACH), Article 57).  |

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving dangerous substances.	P5a	FLAMMABLE LIQUIDS
---	-----	-------------------

E1 ENVIRONMENTAL HAZARDS

Water hazard class (Germany)	:	WGK 3 highly hazardous to water Remarks: Code Number: 8446, Classification according to AwSV
------------------------------	---	---

#### Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Product is subject to Betriebs-Sicherheits-Verordnung (BetrSichV).  
Compliance with paragraph 22 of Youth Employment Law.  
Take note of Law on the protection of mothers at work, in education and in studies (Maternity Protection Act - MuSchG).  
Product is subject to Störfallverordnung (12. BImSchV) based on Seveso III directive (2012/18/EU).

The product is subject to the supply restrictions of the Ordinance on the Prohibition of Chemicals.

### Further information

Training advice : Provide adequate information, instruction and training for operators.

Other information : For Industry guidance and tools on REACH please visit the CEFIC website at <http://cefic.org/Industry-support>.  
The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not considered to be PBT or vPvB.

A vertical bar (|) in the left margin indicates an amendment from the previous version.

This product is classified as R22/H302 Harmful if swallowed. The same control advice applies to all uses of this product and is included in Section 8 of the SDS. An exposure scenario is not presented.

There has been an increase in the Health Hazard classification of this product in section 2. Ensure that the related sections (particularly sections 4, 8 & 11) are carefully studied.

Sources of key data used to compile the Safety Data Sheet : The quoted data are from, but not limited to, one or more sources of information (e.g. toxicological data from Shell Health Services, material suppliers' data, CONCAWE, EU IUCLID data base, EC 1272 regulation, etc).

### Classification of the mixture:

Flam. Liq. 1	H224
Acute Tox. 4	H302
Asp. Tox. 1	H304
Acute Tox. 4	H312

### Classification procedure:

On basis of test data.  
Expert judgement and weight of evidence determination.  
Expert judgement and weight of evidence determination.  
Expert judgement and weight of evidence determination.

### Exposure Scenario - Worker

<b>300000000347</b>	
<b>SECTION 1</b>	<b>EXPOSURE SCENARIO TITLE</b>
<b>Title</b>	Manufacture of substance- Industrial
<b>Use Descriptor</b>	<b>Sector of Use:</b> SU 3, SU8, SU9 <b>Process Categories:</b> PROC 1, PROC 2, PROC 3, PROC 8a, PROC 8b, PROC 15 <b>Environmental Release Categories:</b> ERC1, ESVOC SpERC 1.1.v1
<b>Scope of process</b>	Manufacture of the substance or use as a process chemical or extraction agent within closed or contained systems. Includes incidental exposures during recycling/ recovery, material transfers, storage, sampling, associated laboratory activities, maintenance and loading (including marine vessel/barge, road/rail car and bulk container).

SECTION 2		OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES	
Section 2.1		Control of Worker Exposure	
Product Characteristics			
Physical form of product		Liquid, vapour pressure > 10 kPa at STP	
Concentration of the Substance in Mixture/Article		Covers use of substance/product up to 100% (unless stated differently).,	
Frequency and Duration of Use			
Covers daily exposures up to 8 hours (unless stated differently).			
Other Operational Conditions affecting Exposure			
Assumes a good basic standard of occupational hygiene is implemented.			
Contributing Scenarios		Risk Management Measures	
General measures (carcinogens).		Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and maintain all control measures. Consider the need for risk based health surveillance.	
General measures (skin irritants).		Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if

	hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.
General exposures (closed systems)	Handle substance within a closed system.
General exposures (closed systems)with sample collectionGeneral measures (skin irritants).	Handle substance within a closed system. Sample via a closed loop or other system to avoid exposure Ensure operation is undertaken outdoors.
General exposures (closed systems)Use in contained batch processes	Handle substance within a closed system. Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Provide extraction ventilation at points where emissions occur. Avoid carrying out activities involving exposure for more than 4 hours
Process sampling	Sample via a closed loop or other system to avoid exposure Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Avoid carrying out activities involving exposure for more than 1 hour.
Laboratory activities	Handle within a fume cupboard or implement suitable equivalent methods to minimise exposure. Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour).
Bulk transfers(closed systems)	Ensure material transfers are under containment or extract ventilation. Clear transfer lines prior to de-coupling. Ensure operation is undertaken outdoors.
Equipment cleaning and maintenance	Drain down and flush system prior to equipment opening or maintenance. Ensure operation is undertaken outdoors. Clear spills immediately. Wear a respirator conforming to EN140 with Type A filter or better. Retain drain downs in sealed storage pending disposal or for subsequent recycle.
Storage.General measures (skin irritants).	Store substance within a closed system. Ensure material transfers are under containment or extract ventilation. Ensure operation is undertaken outdoors.
<b>Section 2.2</b>	<b>Control of Environmental Exposure</b>
Substance is complex UVCB.

Print Date 01.04.2025

Predominantly hydrophobic.	
Not readily biodegradable.	
<b>Amounts Used</b>	
Fraction of EU tonnage used in region:	0,1
Regional use tonnage (tonnes/year):	5E+04
Fraction of Regional tonnage used locally:	1
Annual site tonnage (tonnes/year):	5E+04
Maximum daily site tonnage (kg/day):	1,7E+05
<b>Frequency and Duration of Use</b>	
Continuous release.	
Emission Days (days/year):	300
<b>Environmental factors not influenced by risk management</b>	
Local freshwater dilution factor:	40
Local marine water dilution factor:	100
<b>Other Operational Conditions affecting Environmental Exposure</b>	
Release fraction to air from process (initial release prior to RMM):	5,0E-02
Release fraction to wastewater from process (initial release prior to RMM):	3,0E-03
Release fraction to soil from process (initial release prior to RMM):	1,0E-04
<b>Technical conditions and measures at process level (source) to prevent release</b>	
Common practices vary across sites thus conservative process re-lease estimates used.	
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>	
Risk from environmental exposure is driven by wastewater treatment plant microbes.	
Prevent discharge of undissolved substance to or recover from onsite wastewater.	
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	
Treat air emission to provide a typical removal efficiency of (%)	90
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of >= (%)	75,3
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	0
<b>Organisational measures to prevent/limit release from site</b>	
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.	
<b>Conditions and Measures related to municipal sewage treatment plant</b>	
Estimated substance removal from wastewater via domestic sewage treatment (%)	95,5
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	95,5
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d)	9,2E+05
Assumed domestic sewage treatment plant flow (m3/d)	10.000
<b>Conditions and Measures related to external treatment of waste for disposal</b>	
During manufacturing no waste of the substance is generated.	
<b>Conditions and measures related to external recovery of waste</b>	

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## IP Extraction Feed

Version	Revision Date:	SDS Number:	Date of last issue: 23.01.2025
8.0	24.03.2025	800001001047	Print Date 01.04.2025

During manufacturing no waste of the substance is generated.

<b>SECTION 3</b>	<b>EXPOSURE ESTIMATION</b>
------------------	----------------------------

<b>Section 3.1 - Health</b>
-----------------------------

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

<b>Section 3.2 -Environment</b>
---------------------------------

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

<b>SECTION 4</b>	<b>GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO</b>
------------------	--

<b>Section 4.1 - Health</b>
-----------------------------

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

<b>Section 4.2 -Environment</b>
---------------------------------

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

Concentration of the Substance in Mixture/Article		Covers use of substance/product up to 100% (unless stated differently).,	
Frequency and Duration of Use			
Covers daily exposures up to 8 hours (unless stated differently).			
Other Operational Conditions affecting Exposure			
Assumes a good basic standard of occupational hygiene is implemented.			
Contributing Scenarios		Risk Management Measures	
General measures (carcinogens).		Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and maintain all control measures. Consider the need for risk based health surveillance.	
General measures (skin irritants).		Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamina-

	tion/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.
General exposures (closed systems)	Handle substance within a closed system.
General exposures (closed systems)with sample collectionGeneral measures (skin irritants).	Handle substance within a closed system. Sample via a closed loop or other system to avoid exposure Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).
General exposures (closed systems)Use in contained batch processes	Handle substance within a closed system. Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Sample via a closed loop or other system to avoid exposure Avoid carrying out activities involving exposure for more than 1 hour.
Process sampling	Sample via a closed loop or other system to avoid exposure Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Avoid carrying out activities involving exposure for more than 1 hour.
Laboratory activities	Handle within a fume cupboard or implement suitable equivalent methods to minimise exposure.
Bulk transfers(closed systems)	Clear transfer lines prior to de-coupling. Ensure material transfers are under containment or extract ventilation. Ensure operation is undertaken outdoors.
Drum and small package filling	Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour). Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.
Equipment cleaning and maintenance	Drain down and flush system prior to equipment opening or maintenance. Ensure operation is undertaken outdoors. Wear a respirator conforming to EN140 with Type A filter or better. Clear spills immediately. Retain drain downs in sealed storage pending disposal or for subsequent recycle.
Storage.General measures (skin irritants).	Store substance within a closed system. Ensure material transfers are under containment or extract ventilation. Ensure operation is undertaken outdoors.

<b>Section 2.2</b>	<b>Control of Environmental Exposure</b>
Substance is complex UVCB.	
Predominantly hydrophobic.	
Not readily biodegradable.	
<b>Amounts Used</b>	
Fraction of EU tonnage used in region:	0,1
Regional use tonnage (tonnes/year):	5E+04
Fraction of Regional tonnage used locally:	2E-03
Annual site tonnage (tonnes/year):	1E+02
Maximum daily site tonnage (kg/day):	5,0E+03
<b>Frequency and Duration of Use</b>	
Continuous release.	
Emission Days (days/year):	20
<b>Environmental factors not influenced by risk management</b>	
Local freshwater dilution factor:	10
Local marine water dilution factor:	100
<b>Other Operational Conditions affecting Environmental Exposure</b>	
Release fraction to air from process (initial release prior to RMM):	1E-03
Release fraction to wastewater from process (initial release prior to RMM):	1E-05
Release fraction to soil from process (initial release prior to RMM):	1E-05
<b>Technical conditions and measures at process level (source) to prevent release</b>	
Common practices vary across sites thus conservative process re-release estimates used.	
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>	
Risk from environmental exposure is driven by freshwater sediment.	
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	
Treat air emission to provide a typical removal efficiency of (%)	90
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of >= (%)	0
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	0
<b>Organisational measures to prevent/limit release from site</b>	
Do not apply industrial sludge to natural soils.	
Sludge should be incinerated, contained or reclaimed.	
<b>Conditions and Measures related to municipal sewage treatment plant</b>	
Estimated substance removal from wastewater via domestic sewage treatment (%)	95,5
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	95,5
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d)	3,1E+07
Assumed domestic sewage treatment plant flow (m3/d)	2.000
<b>Conditions and Measures related to external treatment of waste for disposal</b>	
External treatment and disposal of waste should comply with applicable local and/or regional regulations.	
<b>Conditions and measures related to external recovery of waste</b>	

# SAFETY DATA SHEET

External recovery and recycling of waste should comply with applicable local and/or regional regulations.

<b>SECTION 3</b>	<b>EXPOSURE ESTIMATION</b>
------------------	----------------------------

<b>Section 3.1 - Health</b>
-----------------------------

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

<b>Section 3.2 -Environment</b>
---------------------------------

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

<b>SECTION 4</b>	<b>GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO</b>
------------------	--

<b>Section 4.1 - Health</b>
-----------------------------

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

<b>Section 4.2 -Environment</b>
---------------------------------

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).
