

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

|                                 |                       |
|---------------------------------|-----------------------|
| Trade name                      | : Isopentane 75/25    |
| Product code                    | : Q1124               |
| Unique Formula Identifier (UFI) | : 9KF2-T0CM-2009-33E3 |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                               |  |
|-------------------------------|--|
| Use of the Sub-stance/Mixture | : Industrial Solvent.<br>Please refer to section 16 and/or the annexes for the registered uses under REACH.            |
| Uses advised against          | : This product must not be used in applications other than the above without first seeking the advice of the supplier. |

#### 1.3 Details of the supplier of the safety data sheet

|                               |   |
|-------------------------------|---|
| Manufacturer/Supplier         | : <b>Shell Chemicals Europe B.V.</b><br>PO Box 2334<br>3000 CH Rotterdam<br>Netherlands |
| Telephone                     | : +31 (0)10 441 5137 / +31 (0)10 441 5191   |
| Telefax                       | : +31 (0)20 716 8316 / +31 (0)20 713 9230   |
| Contact for Safety Data Sheet | : sccmsds@shell.com   |

#### 1.4 Emergency telephone number

+44 (0) 1235 239 670  
Nationaal Vergiftigingen Informatie Centrum (NVIC): Tel. nr. +31 30 – 2748888 (24 uur per dag en 7 dagen per week).  
'Uitsluitend bestemd om artsen te informeren bij accidentele vergiftigingen).

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

##### Classification (REGULATION (EC) No 1272/2008)

|   |   |
|---|---|
| Flammable liquids, Category 1               | H224: Extremely flammable liquid and vapour.        |
| Aspiration hazard, Category 1               | H304: May be fatal if swallowed and enters airways. |
| Specific target organ toxicity - single ex- | H336: May cause drowsiness or dizziness.            |

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

posure, Category 3

Long-term (chronic) aquatic hazard, Category 2

H411: Toxic to aquatic life with long lasting effects.

### 2.2 Label elements

#### Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal word : Danger

Hazard statements :

PHYSICAL HAZARDS:  
H224 Extremely flammable liquid and vapour.  
HEALTH HAZARDS:  
H304 May be fatal if swallowed and enters airways.  
H336 May cause drowsiness or dizziness.  
ENVIRONMENTAL HAZARDS:  
H411 Toxic to aquatic life with long lasting effects.

Supplemental Hazard Statements : EUH066 Repeated exposure may cause skin dryness or cracking.

Precautionary statements : **Prevention:**  
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
P243 Take action to prevent static discharges.  
P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.  
P273 Avoid release to the environment.

**Response:**  
P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor.  
P331 Do NOT induce vomiting.

**Storage:**  
No precautionary phrases.

**Disposal:**  
P501 Dispose of contents/ container to an approved waste disposal plant.

### 2.3 Other hazards

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

Version 3.0      Revision Date: 23.11.2023      SDS Number: 800010029515      Date of last issue: 29.03.2023  
Print Date 30.11.2023

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

In use, may form flammable/explosive vapour-air mixture.

This material is a static accumulator.

Even with proper grounding and bonding, this material can still accumulate an electrostatic charge.

If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur.

### SECTION 3: Composition/information on ingredients

#### 3.2 Mixtures

##### Components

| Chemical name | CAS-No.<br>EC-No.<br>Index-No.<br>Registration number     | Classification   | Concentration<br>(% w/w) |
|---------------|---|--|--------------------------|
| isopentane    | 78-78-4<br>201-142-8<br>601-085-00-2<br>01-2119475602-38  | Flam. Liq. 1; H224<br>Asp. Tox. 1; H304<br>STOT SE 3; H336<br>Aquatic Chronic 2;<br>H411                                 | 75                       |
| pentane       | 109-66-0<br>203-692-4<br>601-006-00-1<br>01-2119459286-30 | Flam. Liq. 1; H224<br>Asp. Tox. 1; H304<br>STOT SE 3; H336<br>(Narcotic effects)<br>Aquatic Chronic 2;<br>H411<br>EUH066 | 25                       |

For explanation of abbreviations see section 16.

### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

- General advice : Not expected to be a health hazard when used under normal conditions.
- Protection of first-aiders : When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
- If inhaled : Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.
- In case of skin contact : Remove contaminated clothing. Flush exposed area with wa-

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

- 
- ter and follow by washing with soap if available.  
If persistent irritation occurs, obtain medical attention.
- In case of eye contact : Flush eye with copious quantities of water.  
Remove contact lenses, if present and easy to do. Continue rinsing.  
If persistent irritation occurs, obtain medical attention.
- If swallowed : Call emergency number for your location / facility.  
If swallowed, do not induce vomiting: transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.  
If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

### 4.2 Most important symptoms and effects, both acute and delayed

- Symptoms : Breathing of high vapour concentrations may cause central nervous system (CNS) depression resulting in dizziness, light-headedness, headache, nausea and loss of coordination.  
Continued inhalation may result in unconsciousness and death.  
Skin irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blisters.  
Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision.  
If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath, and/or fever.  
If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.  
Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance.

### 4.3 Indication of any immediate medical attention and special treatment needed

- Treatment : Call a doctor or poison control center for guidance.  
Potential for chemical pneumonitis.  
Treat symptomatically.

---

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

- Suitable extinguishing media : Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
- Unsuitable extinguishing media : Do not use water in a jet.

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

---

### 5.2 Special hazards arising from the substance or mixture

Specific hazards during fire-fighting : Clear fire area of all non-emergency personnel.  
Hazardous combustion products may include:  
A complex mixture of airborne solid and liquid particulates and gases (smoke).  
Carbon monoxide.  
Unidentified organic and inorganic compounds.  
Flammable vapours may be present even at temperatures below the flash point.  
The vapour is heavier than air, spreads along the ground and distant ignition is possible.  
Will float and can be reignited on surface water.

### 5.3 Advice for firefighters

Special protective equipment for firefighters : Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

Specific extinguishing methods : Standard procedure for chemical fires.

Further information : Keep adjacent containers cool by spraying with water.

---

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : Observe all relevant local and international regulations.  
Notify authorities if any exposure to the general public or the environment occurs or is likely to occur.  
Local authorities should be advised if significant spillages cannot be contained.  
6.1.1 For non emergency personnel:  
Avoid contact with skin, eyes and clothing.  
Isolate hazard area and deny entry to unnecessary or unprotected personnel.  
Do not breathe fumes, vapour.  
Do not operate electrical equipment.  
6.1.2 For emergency responders:  
Avoid contact with skin, eyes and clothing.  
Isolate hazard area and deny entry to unnecessary or unprotected personnel.  
Do not breathe fumes, vapour.  
Do not operate electrical equipment.

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

### 6.2 Environmental precautions

Environmental precautions : Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapour or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Monitor area with combustible gas indicator.

### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up : For small liquid spills (< 1 drum), transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

Ventilate contaminated area thoroughly.  
If contamination of site occurs remediation may require specialist advice.

### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet.,  
For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

## SECTION 7: Handling and storage

### 7.1 Precautions for safe handling

Technical measures : Avoid breathing of or direct contact with material. Only use in well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet.

Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

Ensure that all local regulations regarding handling and storage facilities are followed.

Advice on safe handling : Avoid inhaling vapour and/or mists.  
Avoid contact with skin, eyes and clothing.  
Extinguish any naked flames. Do not smoke. Remove ignition

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

sources. Avoid sparks.  
Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.  
Bulk storage tanks should be diked (bunded).  
When using do not eat or drink.

The vapour is heavier than air, spreads along the ground and distant ignition is possible.

Product Transfer : Even with proper grounding and bonding, this material can still accumulate an electrostatic charge. If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur. Be aware of handling operations that may give rise to additional hazards that result from the accumulation of static charges. These include but are not limited to pumping (especially turbulent flow), mixing, filtering, splash filling, cleaning and filling of tanks and containers, sampling, switch loading, gauging, vacuum truck operations, and mechanical movements. These activities may lead to static discharge e.g. spark formation. Restrict line velocity during pumping in order to avoid generation of electrostatic discharge ( $\leq 1$  m/s until fill pipe submerged to twice its diameter, then  $\leq 7$  m/s). Avoid splash filling. Do NOT use compressed air for filling, discharging, or handling operations.

Refer to guidance under Handling section.

Hygiene measures : Wash hands before eating, drinking, smoking and using the toilet. Launder contaminated clothing before re-use. Do not ingest. If swallowed, then seek immediate medical assistance.

### 7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.

Further information on storage stability : Storage Temperature:  
Ambient.

Bulk storage tanks should be diked (bunded).  
Locate tanks away from heat and other sources of ignition.  
Cleaning, inspection and maintenance of storage tanks is a specialist operation, which requires the implementation of strict procedures and precautions.  
Must be stored in a diked (bunded) well-ventilated area, away from sunlight, ignition sources and other sources of heat.  
Keep away from aerosols, flammables, oxidizing agents, corrosives and from other flammable products which are not harmful or toxic to man or to the environment.  
Electrostatic charges will be generated during pumping.  
Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment to reduce the risk.

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

Version 3.0      Revision Date: 23.11.2023      SDS Number: 800010029515      Date of last issue: 29.03.2023  
Print Date 30.11.2023

- Packaging material : The vapours in the head space of the storage vessel may lie in the flammable/explosive range and hence may be flammable.  
: Suitable material: For containers, or container linings use mild steel, stainless steel., For container paints, use epoxy paint, zinc silicate paint.  
Unsuitable material: Avoid prolonged contact with natural, butyl or nitrile rubbers.
- Container Advice : Do not cut, drill, grind, weld or perform similar operations on or near containers.

### 7.3 Specific end use(s)

- Specific use(s) : Please refer to section 16 and/or the annexes for the registered uses under REACH.

See additional references that provide safe handling practices for liquids that are determined to be static accumulators: American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practices on Static Electricity).  
IEC/TS 60079-32-1: Electrostatic hazards, guidance

## SECTION 8: Exposure controls/personal protection

### 8.1 Control parameters

#### Occupational Exposure Limits

| Components                      | CAS-No.  | Value type (Form of exposure) | Control parameters                   | Basis      |
|---------------------------------|----------|-------------------------------|--------------------------------------|------------|
| pentane                         | 109-66-0 | TLV-8hr                       | 600 ppm<br>1.800 mg/m <sup>3</sup>   | NL WG      |

| pentane    | Consumers | Oral       | Long-term systemic effects | 214 mg/kg bw/day |

### Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

| Substance name | Environmental Compartment | Value                 |
|----------------|---------------------------|-----------------------|
| isopentane     | Water                     | 0,25 mg/l             |
| isopentane     | Sediment                  | 1,10 mg/kg            |
| isopentane     | Soil                      | 0,55 mg/kg            |
| isopentane     | Sewage treatment plant    | 3,9 mg/l              |
| pentane        | Water                     | 0,23 mg/l             |
| pentane        | Sediment                  | 1,2 mg/kg             |
| pentane        | Soil                      | 0,55 mg/kg wet weight |
| pentane        | Sewage treatment plant    | 3,6 mg/l              |

## 8.2 Exposure controls

### Engineering measures

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex.

Use sealed systems as far as possible.

Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits.

Local exhaust ventilation is recommended.

Eye washes and showers for emergency use.

Firewater monitors and deluge systems are recommended.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

### General Information:

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

Define procedures for safe handling and maintenance of controls.  
Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.  
Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.  
Drain down system prior to equipment break-in or maintenance.  
Retain drain downs in sealed storage pending disposal or for subsequent recycle.

### Personal protective equipment

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex. The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection : Wear goggles for use against liquids and gas.  
Approved to EU Standard EN166.

Hand protection

Remarks : Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. Longer term protection: Nitrile rubber gloves. Incidental contact/Splash protection: PVC or neoprene rubber gloves. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

Skin and body protection : Skin protection is not required under normal conditions of use.  
For prolonged or repeated exposures use impervious clothing over parts of the body subject to exposure.

If repeated and/or prolonged skin exposure to the substance

# SAFETY DATA SHEET

## Isopentane 75/25

|                |                              |                             |   |
|----------------|------------------------------|-----------------------------|---|
| Version<br>3.0 | Revision Date:<br>23.11.2023 | SDS Number:<br>800010029515 | Date of last issue: 29.03.2023<br>Print Date 30.11.2023 |
|----------------|------------------------------|-----------------------------|---|

is likely, then wear suitable gloves tested to relevant Standard, and provide employee skin care programmes.  
Protective clothing approved to EU Standard EN14605.

Wear antistatic and flame-retardant clothing, if a local risk assessment deems it so.

Respiratory protection : If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. If air-filtering respirators are suitable for conditions of use: Select a filter suitable for organic gases and vapours [Type AX boiling point < 65°C (149°F)] meeting EN14387.

## SECTION 9: Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

|                             |                      |
|-----------------------------|----------------------|
| Physical state              | : Liquid.            |
| Colour                      | : colourless         |
| Odour                       | : Paraffinic         |
| Odour Threshold             | : Data not available |
| pour point                  | : -150 °C            |
| Melting / freezing point    | -160,5 °C            |
| Boiling point/boiling range | : Typical 24 - 32 °C |

#### Flammability

Flammability (solid, gas) : Not applicable

#### Lower explosion limit and upper explosion limit / flammability limit

Upper explosion limit /  
upper flammability limit : 7,6 %(V)

Lower explosion limit /  
Lower flammability limit : 1,3 %(V)

| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

Evaporation rate : 1  
Method: DIN 53170, di-ethyl ether=1

12  
Method: ASTM D 3539, nBuAc=1

Conductivity : 0,25 pS/m at 20 °C  
Method: ASTM D-4308  
Low conductivity: < 100 pS/m

The conductivity of this material makes it a static accumulator., A liquid is typically considered nonconductive if its conductivity is below 100 pS/m and is considered semi-conductive if its conductivity is below 10,000 pS/m., Whether a liquid is nonconductive or semiconductive, the precautions are the same., A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can greatly influence the conductivity of a liquid

Surface tension : Data not available

Molecular weight : 72 g/mol

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

### 10.2 Chemical stability

No hazardous reaction is expected when handled and stored according to provisions  
Stable under normal conditions of use.

### 10.3 Possibility of hazardous reactions

Hazardous reactions : Reacts with strong oxidising agents.

### 10.4 Conditions to avoid

Conditions to avoid : Avoid heat, sparks, open flames and other ignition sources.

In certain circumstances product can ignite due to static electricity.

### 10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.

### 10.6 Hazardous decomposition products

Hazardous decomposition products are not expected to form during normal storage.  
Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases including carbon monoxide, carbon dioxide, sulphur oxides and unidentified or-

ganic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

### SECTION 11: Toxicological information

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Information on likely routes of exposure : Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.

##### Acute toxicity

###### Components:

###### isopentane:

Acute oral toxicity : LD 50 (Rat, male and female): > 5.000 mg/kg  
Method: OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LD50 (Rat, male and female): > 20 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.

###### pentane:

Acute oral toxicity : LD50 (Rat, male and female): > 5.000 mg/kg  
Method: OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC50 (Rat, male and female): > 20 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.

##### Skin corrosion/irritation

###### Components:

###### isopentane:

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 404  
Remarks : Slightly irritating.  
Insufficient to classify.

Toxicity to algae/aquatic plants : EC50 (Scenedesmus capricornutum (fresh water algae)): 10,7 mg/l  
Exposure time: 72 h  
Method: OECD Test Guideline 201  
Remarks: Harmful  
LL/EL/IL50 >10 <= 100 mg/l

Toxicity to microorganisms : NOEL (Tetrahymena pyriformis): 23,7 mg/l  
Exposure time: 48 h  
Method: Based on quantitative structure-activity relationship (QSAR) modelling  
Remarks: NOEC/NOEL >100 mg/l

Toxicity to fish (Chronic toxicity) : NOELR: 6,165 mg/l  
Exposure time: 28 d  
Species: Oncorhynchus mykiss (rainbow trout)  
Method: Based on quantitative structure-activity relationship (QSAR) modelling  
Remarks: NOEC/NOEL > 1.0 - <= 10 mg/l

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOELR: 10,76 mg/l  
Exposure time: 21 d  
Species: Daphnia magna (Water flea)  
Method: Based on quantitative structure-activity relationship (QSAR) modelling  
Remarks: no data available

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

### 12.2 Persistence and degradability

#### Components:

##### **isopentane:**

Biodegradability : Biodegradation: 71 %  
Exposure time: 28 d  
Method: Test(s) equivalent or similar to OECD Guideline 301 F  
Remarks: Readily biodegradable.  
Oxidises rapidly by photo-chemical reactions in air.

##### **pentane:**

Biodegradability : Biodegradation: 87 %  
Exposure time: 28 d  
Method: Test(s) equivalent or similar to OECD Guideline 301 F  
Remarks: Readily biodegradable.  
Oxidises rapidly by photo-chemical reactions in air.

### 12.3 Bioaccumulative potential

#### Components:

##### **isopentane:**

Bioaccumulation : Species: Pimephales promelas (fathead minnow)  
Bioconcentration factor (BCF): 171  
Method: Information given is based on data obtained from similar substances.  
Remarks: Does not bioaccumulate significantly.

##### **pentane:**

Bioaccumulation : Species: Pimephales promelas (fathead minnow)  
Bioconcentration factor (BCF): 171  
Method: Based on quantitative structure-activity relationship (QSAR) modelling  
Remarks: Does not bioaccumulate significantly.

### 12.4 Mobility in soil

#### Components:

##### **isopentane:**

Mobility : Remarks: Floats on water., If the product enters soil, one or more constituents will or may be mobile and may contaminate groundwater.

##### **pentane:**

Mobility : Remarks: Floats on water., If the product enters soil, one or more constituents will or may be mobile and may contaminate

---

groundwater.

### 12.5 Results of PBT and vPvB assessment

#### Components:

##### **isopentane:**

Assessment : The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not considered to be PBT or vPvB..

##### **pentane:**

Assessment : The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not considered to be PBT or vPvB..

### 12.6 Endocrine disrupting properties

#### Product:

Assessment : The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

### 12.7 Other adverse effects

#### Product:

Additional ecological information : Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

#### Components:

##### **isopentane:**

Additional ecological information : In view of the high rate of loss from solution, the product is unlikely to pose a significant hazard to aquatic life.  
Does not have ozone depletion potential.

##### **pentane:**

Additional ecological information : In view of the high rate of loss from solution, the product is unlikely to pose a significant hazard to aquatic life.

---

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

Product : Recover or recycle if possible.  
It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

|         |                |              |                                |
|---------|----------------|--------------|--------------------------------|
| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

determine the proper waste classification and disposal methods in compliance with applicable regulations.  
Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment.  
Do not dispose into the environment, in drains or in water courses.  
Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination.  
Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

Waste, spills or used product is dangerous waste.

Disposal should be in accordance with applicable regional, national, and local laws and regulations.  
Local regulations may be more stringent than regional or national requirements and must be complied with.

MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.

Contaminated packaging : Drain container thoroughly.  
After draining, vent in a safe place away from sparks and fire.  
Residues may cause an explosion hazard. Do not puncture, cut or weld uncleaned drums.  
Send to drum recoverer or metal reclaimer.  
Comply with any local recovery or waste disposal regulations.

### SECTION 15: Regulatory information

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving dangerous substances.

P5a FLAMMABLE LIQUIDS

P5a FLAMMABLE LIQUIDS

E2 ENVIRONMENTAL HAZARDS

#### Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Product is subject to Major accident risk decision 2015 (BRZO+) based on Seveso III directive (2012/18/EU).

#### The components of this product are reported in the following inventories:

AICS : Listed

DSL : Listed

IECSC : Listed

ENCS : Listed

KECI : Listed

NZIoC : Listed

PICCS : Listed

TSCA : Listed

#### 15.2 Chemical safety assessment

A Chemical Safety Assessment has been carried out for this substance.

### Further information

Training advice : Provide adequate information, instruction and training for operators.

Other information : For Industry guidance and tools on REACH please visit the CEFIC website at <http://cefic.org/Industry-support>.  
The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not considered to be PBT or vPvB.

A vertical bar (|) in the left margin indicates an amendment from the previous version.

Sources of key data used to compile the Safety Data Sheet : The quoted data are from, but not limited to, one or more sources of information (e.g. toxicological data from Shell Health Services, material suppliers' data, CONCAWE, EU IUCLID data base, EC 1272 regulation, etc).

### Classification of the mixture:

|                   |      |
|-------------------|------|
| Flam. Liq. 1      | H224 |
| Asp. Tox. 1       | H304 |
| STOT SE 3         | H336 |
| Aquatic Chronic 2 | H411 |

### Classification procedure:

On basis of test data.  
Expert judgement and weight of evidence determination.  
Expert judgement and weight of evidence determination.

### Conditions and measures related to external recovery of waste

During manufacturing no waste of the substance is generated.

### SECTION 3

### EXPOSURE ESTIMATION

#### Section 3.1 - Health

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

#### Section 3.2 -Environment

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

### SECTION 4

### GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

| Version | Revision Date: | SDS Number:  | Date of last issue: 29.03.2023 |
| 3.0     | 23.11.2023     | 800010029515 | Print Date 30.11.2023          |

External recovery and recycling of waste should comply with applicable local and/or regional regulations.

### SECTION 3 EXPOSURE ESTIMATION

#### Section 3.1 - Health

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

#### Section 3.2 -Environment

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

### SECTION 4 GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

---

### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

### Section 3.2 -Environment

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

### SECTION 4

### GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

regulations.

### Conditions and measures related to external recovery of waste

External recovery and recycling of waste should comply with applicable local and/or regional regulations.

## SECTION 3

### EXPOSURE ESTIMATION

#### Section 3.1 - Health

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

#### Section 3.2 -Environment

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

## SECTION 4

### GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

### Exposure Scenario - Worker

|                         |   |
|-------------------------|---|
| <b>300000000639</b>     |   |
| <b>SECTION 1</b>        | <b>EXPOSURE SCENARIO TITLE</b>  |
| <b>Title</b>            | Use in laboratories- Professional   |
| <b>Use Descriptor</b>   | <b>Sector of Use:</b> SU22<br><b>Process Categories:</b> PROC 10, PROC 15<br><b>Environmental Release Categories:</b> ERC8a, ESVOC<br>SpERC 8.17.v1 |
| <b>Scope of process</b> | Use of small quantities within laboratory settings, including material transfers and equipment cleaning.  |

|   |  |         |
|---|--|---------|
| SECTION 2   | OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES                      |         |
| Section 2.1   | Control of Worker Exposure   |         |
| Product Characteristics   |  |         |
| Physical form of product  | Liquid, vapour pressure > 10 kPa at STP                                  |         |
| Concentration of the Substance in Mixture/Article   | Covers use of substance/product up to 100% (unless stated differently)., |         |
| Frequency and Duration of Use   |  |         |
| Covers daily exposures up to 8 hours (unless stated differently).   |  |         |
| Other Operational Conditions affecting Exposure   |  |         |
| Assumes use at not more than 20°C above ambient temperature (unless stated differently).<br>Assumes a good basic standard of occupational hygiene is implemented. |  |         |
| Contributing Scenarios  | Risk Management Measures   |         |
| Laboratory activitiesPROC15   | No other specific measures identified.                                   |         |
| CleaningPROC10  | No other specific measures identified.                                   |         |
| Section 2.2   | Control of Environmental Exposure  |         |
| Substance is isomeric mixture.  |  |         |
| Predominantly hydrophobic.  |  |         |
| Readily biodegradable.  |  |         |
| Amounts Used  |  |         |
| Fraction of EU tonnage used in region:  |  | 0,1     |
| Regional use tonnage (tonnes/year):   |  | 0,5     |
| Fraction of Regional tonnage used locally:  |  | 5,0E-04 |
| Annual site tonnage (tonnes/year):  |  | 2,5E-04 |
| Maximum daily site tonnage (kg/day):  |  | 6,9E-04 |
| Frequency and Duration of Use   |  |         |
| Continuous release.   |  |         |
| Emission Days (days/year):  |  | 365     |
| Environmental factors not influenced by risk management   |  |         |
| Local freshwater dilution factor:   |  | 10      |
| Local marine water dilution factor:   |  | 100     |

# SAFETY DATA SHEET

## Isopentane 75/25

Version 3.0      Revision Date: 23.11.2023      SDS Number: 800010029515      Date of last issue: 29.03.2023  
Print Date 30.11.2023

|   |         |
|---|---------|
| <b>Other Operational Conditions affecting Environmental Exposure</b>  |         |
| Release fraction to air from process (initial release prior to RMM):  | 0,5     |
| Release fraction to wastewater from process (initial release prior to RMM):                                       | 0,5     |
| Release fraction to soil from process (initial release prior to RMM):   | 0       |
| <b>Technical conditions and measures at process level (source) to prevent release</b>                             |         |
| Common practices vary across sites thus conservative process re-release estimates used.                           |         |
| <b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b> |         |
| Risk from environmental exposure is driven by freshwater.   |         |
| No wastewater treatment required.   |         |
| Treat air emission to provide a typical removal efficiency of (%)   | 0       |
| Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of >= (%) | 0       |
| If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.                    | 0       |
| <b>Organisational measures to prevent/limit release from site</b>   |         |
| Do not apply industrial sludge to natural soils.  |         |
| Sludge should be incinerated, contained or reclaimed.   |         |
| <b>Conditions and Measures related to municipal sewage treatment plant</b>  |         |
| Estimated substance removal from wastewater via domestic sewage treatment (%)                                     | 97,1    |
| Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)          | 97,1    |
| Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d)       | 56      |
| Assumed domestic sewage treatment plant flow (m3/d)   | 2,0E+03 |
| <b>Conditions and Measures related to external treatment of waste for disposal</b>                                |         |
| External treatment and disposal of waste should comply with applicable local and/or regional regulations.         |         |
| <b>Conditions and measures related to external recovery of waste</b>  |         |
| External recovery and recycling of waste should comply with applicable local and/or regional regulations.         |         |

|   |                            |
|---|----------------------------|
| <b>SECTION 3</b>  | <b>EXPOSURE ESTIMATION</b> |
| <b>Section 3.1 - Health</b>   |                            |
| The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated. |                            |

|  |  |
|--|--|
| <b>Section 3.2 -Environment</b>  |  |
| The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model. |  |

|                  |  |

# SAFETY DATA SHEET

According to EC No 1907/2006 as amended as at the date of this SDS

## Isopentane 75/25

Version 3.0      Revision Date: 23.11.2023      SDS Number: 800010029515      Date of last issue: 29.03.2023  
Print Date 30.11.2023

| EXPOSURE SCENARIO   |
|---|
| <b>Section 4.1 - Health</b>   |
| Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.<br>Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. |
| <b>Section 4.2 -Environment</b>   |
| Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.  |
| Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.   |
| Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.   |
| Further details on scaling and control technologies are provided in SpERC factsheet ( <a href="http://cefic.org">http://cefic.org</a> ).  |
