According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Trade name : SBP 40/65 LNH

Product code : Q5113

Synonyms : Hydrocarbons, C6, Isoalkanes, <5% n-hexane and n-pentane,

Special boiling point spirit 40/65

Unique Formula Identifier

(UFI)

: 3A01-20MD-N00G-H6A3

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- : Industrial Solvent.

stance/Mixture Please refer to section 16 and/or the annexes for the regis-

tered uses under REACH.

Uses advised against :

This product must not be used in applications other than the

above without first seeking the advice of the supplier.

This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup-

plier.

## 1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier : Shell Chemicals Europe B.V.

PO Box 2334

3000 CH Rotterdam

Netherlands

Telephone : +31 (0)10 441 5137 / +31 (0)10 441 5191 Telefax : +31 (0)20 716 8316/ +31 (0)20 713 9230

Contact for Safety Data : sccmsds@shell.com

Sheet

#### 1.4 Emergency telephone number

Toxicological Information Center Address: Na Bojišti 1, 120 00 Prague 2, Czech Republic

Telephone: +420 224 919 293 / +420 224 915 4

+44 (0) 1235 239 670 (This telephone number is available 24 hours per day, 7 days per

week)

#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Flammable liquids, Category 2 H225: Highly flammable liquid and vapour.

Skin irritation, Category 2 H315: Causes skin irritation.

Specific target organ toxicity - single exposure, Category 3, Narcotic effects

H336: May cause drowsiness or dizziness.

Aspiration hazard, Category 1 H304: May be fatal if swallowed and enters air-

ways.

Long-term (chronic) aquatic hazard, Cat-

egory 2

H411: Toxic to aquatic life with long lasting effects.

#### 2.2 Label elements

### Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal word : Danger

Hazard statements : PHYSICAL HAZARDS:

H225 Highly flammable liquid and vapour.

**HEALTH HAZARDS:** 

H315 Causes skin irritation.

H336 May cause drowsiness or dizziness.

H304 May be fatal if swallowed and enters airways.

**ENVIRONMENTAL HAZARDS:** 

H411 Toxic to aquatic life with long lasting effects.

Precautionary statements : Prevention:

P210 Keep away from heat, hot surfaces, sparks, open

flames and other ignition sources. No smoking. P243 Take action to prevent static discharges.

P280 Wear protective gloves/ protective clothing/ eye protec-

tion/ face protection.

P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.

Response:

P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower. P304 + P340 IF INHALED: Remove person to fresh air and

keep comfortable for breathing.

P301 + P310 IF SWALLOWED: Immediately call a POISON

CENTER/ doctor.

P331 Do NOT induce vomiting.

Storage:

No precautionary phrases.

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

## Disposal:

No precautionary phrases.

#### 2.3 Other hazards

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

No specific hazards under normal use conditions.

## **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

### Components

Chemical name	CAS-No. EC-No.	Classification	Concentration (% w/w)
	Index-No. Registration number		
Hydrocarbons, C6, isoalkanes, <5% n-hexane	Not Assigned 931-254-9 01-2119484651-34	Flam. Liq. 2; H225 Asp. Tox. 1; H304 Skin Irrit. 2; H315 STOT SE 3; H336 (Narcotic effects) Aquatic Chronic 2; H411	<= 70
pentane	109-66-0 203-692-4 601-006-00-1 01-2119459286-30	Flam. Liq. 1; H224 Asp. Tox. 1; H304 STOT SE 3; H336 (Narcotic effects) Aquatic Chronic 2; H411 EUH066	<= 70

For explanation of abbreviations see section 16.

## **Further information**

#### Contains:

Chemical name	Identification number	Classification	Concentration (% w/w)
n-Hexane	110-54-3, 203- 777-6	Flam. Liq.2; H225 Skin Irrit.2; H315 Asp. Tox.1; H304 STOT RE2; H373 STOT SE3; H336 Repr.2; H361f	>= 0 - < 5

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

	Aquatic Chronic2; H411	
--	---------------------------	--

For explanation of abbreviations see section 16.

#### **SECTION 4: First aid measures**

## 4.1 Description of first aid measures

General advice : Not expected to be a health hazard when used under normal

conditions.

Protection of first-aiders : When administering first aid, ensure that you are wearing the

appropriate personal protective equipment according to the

incident, injury and surroundings.

If inhaled : Remove to fresh air. If rapid recovery does not occur,

transport to nearest medical facility for additional treatment.

In case of skin contact : Remove contaminated clothing. Immediately flush skin with

large amounts of water for at least 15 minutes, and follow by washing with soap and water if available. If redness, swelling, pain and/or blisters occur, transport to the nearest medical

facility for additional treatment.

In case of eye contact : Flush eye with copious quantities of water.

Remove contact lenses, if present and easy to do. Continue

rinsing.

If persistent irritation occurs, obtain medical attention.

If swallowed : Call emergency number for your location / facility.

If swallowed, do not induce vomiting: transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

#### 4.2 Most important symptoms and effects, both acute and delayed

Symptoms : Breathing of high vapour concentrations may cause central

nervous system (CNS) depression resulting in dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and

death.

Skin irritation signs and symptoms may include a burning sen-

sation, redness, swelling, and/or blisters.

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version 1.0

Revision Date: 18.02.2025

SDS Number: 800001013575

Date of last issue: -Print Date 25.02.2025

No specific hazards under normal use conditions.

Eye irritation signs and symptoms may include a burning sen-

sation, redness, swelling, and/or blurred vision.

If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest

congestion, shortness of breath, and/or fever.

If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

## 4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Call a doctor or poison control center for guidance.

Potential for chemical pneumonitis.

Treat symptomatically.

Causes central nervous system depression.

## **SECTION 5: Firefighting measures**

#### 5.1 Extinguishing media

Suitable extinguishing media : Foam, water spray or fog. Dry chemical powder, carbon diox-

ide, sand or earth may be used for small fires only.

Unsuitable extinguishing

media

Do not use water in a jet.

#### 5.2 Special hazards arising from the substance or mixture

Specific hazards during fire-

fighting

Clear fire area of all non-emergency personnel. Hazardous combustion products may include:

A complex mixture of airborne solid and liquid particulates and

gases (smoke). Carbon monoxide.

Unidentified organic and inorganic compounds.

Flammable vapours may be present even at temperatures

below the flash point.

The vapour is heavier than air, spreads along the ground and

distant ignition is possible.

Will float and can be reignited on surface water.

## 5.3 Advice for firefighters

Special protective equipment:

for firefighters

Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to

relevant Standards (e.g. Europe: EN469).

Specific extinguishing meth-

ods

Standard procedure for chemical fires.

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Further information : Keep adjacent containers cool by spraying with water.

#### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions

Observe all relevant local and international regulations.

Notify authorities if any exposure to the general public or the

environment occurs or is likely to occur.

Local authorities should be advised if significant spillages

cannot be contained.

6.1.1 For non emergency personnel: Avoid contact with skin, eyes and clothing.

Isolate hazard area and deny entry to unnecessary or unpro-

tected personnel.

Do not breathe fumes, vapour. Do not operate electrical equipment. 6.1.2 For emergency responders:

Avoid contact with skin, eyes and clothing.

Isolate hazard area and deny entry to unnecessary or unpro-

tected personnel.

Do not breathe fumes, vapour.
Do not operate electrical equipment.

#### 6.2 Environmental precautions

Environmental precautions : S

Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapour or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bond-

ing and grounding (earthing) all equipment. Monitor area with combustible gas indicator.

## 6.3 Methods and material for containment and cleaning up

Methods for cleaning up

For small liquid spills (< 1 drum), transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove

contaminated soil and dispose of safely.

For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Ventilate contaminated area thoroughly.

If contamination of site occurs remediation may require spe-

cialist advice.

#### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

## **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

Technical measures : Avoid breathing of or direct contact with material. Only use in

well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see

Section 8 of this Safety Data Sheet.

Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this

- .. .

Ensure that all local regulations regarding handling and stor-

age facilities are followed.

Advice on safe handling : Avoid inhaling vapour and/or mists.

Avoid contact with skin, eyes and clothing.

Extinguish any naked flames. Do not smoke. Remove ignition

sources. Avoid sparks.

Use local exhaust ventilation if there is risk of inhalation of

vapours, mists or aerosols.

Bulk storage tanks should be diked (bunded).

When using do not eat or drink.

The vapour is heavier than air, spreads along the ground and

distant ignition is possible.

Product Transfer : Even with proper grounding and bonding, this material can still

accumulate an electrostatic charge. If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur. Be aware of handling operations that may give rise to additional hazards that result from the accumulation of static charges. These include but are not limited to pumping (especially turbulent flow), mixing, filtering, splash filling, cleaning and filling of tanks and containers, sampling, switch loading, gauging, vacuum truck operations, and mechanical movements. These activities may lead to static discharge e.g. spark formation. Restrict line velocity during pumping in order to avoid generation of electrostatic discharge ( $\leq 1$  m/s until fill pipe submerged to twice its diameter, then  $\leq 7$  m/s). Avoid splash filling. Do NOT use compressed air for filling, discharging, or handling operations.

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: 1.0 18.02.2025

SDS Number: 800001013575

Date of last issue: -Print Date 25.02.2025

Refer to guidance under Handling section.

Hygiene measures : Wash hands before eating, drinking, smoking and using the

toilet. Launder contaminated clothing before re-use. Do not ingest. If swallowed, then seek immediate medical assistance.

#### 7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers

: Refer to section 15 for any additional specific legislation cov-

ering the packaging and storage of this product.

Further information on storage stability

Storage Temperature:

Ambient.

Bulk storage tanks should be diked (bunded).

Locate tanks away from heat and other sources of ignition. Cleaning, inspection and maintenance of storage tanks is a specialist operation, which requires the implementation of

strict procedures and precautions.

Must be stored in a diked (bunded) well- ventilated area, away from sunlight, ignition sources and other sources of heat. Keep away from aerosols, flammables, oxidizing agents, corrosives and from other flammable products which are not

harmful or toxic to man or to the environment.

Electrostatic charges will be generated during pumping. Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment to

reduce the risk.

The vapours in the head space of the storage vessel may lie in the flammable/explosive range and hence may be flamma-

ble.

Packaging material : Suitable material: For containers, or container linings use mild

steel, stainless steel., For container paints, use epoxy paint,

zinc silicate paint.

Unsuitable material: Avoid prolonged contact with natural,

butyl or nitrile rubbers.

Container Advice : Do not cut, drill, grind, weld or perform similar operations on or

near containers.

7.3 Specific end use(s)

Specific use(s) : Please refer to section 16 and/or the annexes for the regis-

tered uses under REACH.

See additional references that provide safe handling practices for liquids that are determined to be static accumulators:

American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practices

on Static Electricity).

IEC/TS 60079-32-1: Electrostatic hazards, guidance

According to EC No 1907/2006 as amended as at the date of this SDS

Version Revision Date: SDS Number: Date of last issue: 1.0 18.02.2025 800001013575 Print Date 25.02.2025

## **SECTION 8: Exposure controls/personal protection**

## 8.1 Control parameters

## **Occupational Exposure Limits**

Components	CAS-No.	Value type (Form	Control parameters	Basis
		of exposure)		
Isohexanes	Not As-	TWA	900 mg/m3	EU HSPA
	signed			
pentane	109-66-0	TWA	1.000 ppm	CZ OEL
			3.000 mg/m3	
pentane		STEL	1.500 ppm	CZ OEL
			4.500 mg/m3	
pentane		TWA	1.000 ppm	2006/15/EC
			3.000 mg/m3	
	Further inform	Further information: Indicative		
n-Hexane	110-54-3	TWA	19,5 ppm	CZ OEL
			70 mg/m3	
	Further inform	Further information: irritating to mucous membranes (eyes, respiratory sys-		
	tem) respectively skin, Contributes significantly to the overall exposure			
	through the sl	through the skin		
n-Hexane		STEL	55,8 ppm	CZ OEL
			200 mg/m3	
	Further information: irritating to mucous membranes (eyes, respiratory sys-			
	tem) respectively skin, Contributes significantly to the overall exposure			
	through the skin			
n-Hexane		TWA	20 ppm	2006/15/EC
			72 mg/m3	
	Further information: Indicative			

## **Biological occupational exposure limits**

No biological limit allocated.

## Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End Use	Exposure routes	Potential health effects	Value
Hydrocarbons, C6, isoalkanes, <5% nhexane	Workers	Dermal	Long-term systemic effects	13964 mg/kg
Hydrocarbons, C6, isoalkanes, <5% nhexane	Workers	Inhalation	Long-term systemic effects	5306 mg/m3
Hydrocarbons, C6, isoalkanes, <5% nhexane	Consumers	Dermal	Long-term systemic effects	1377 mg/kg
Hydrocarbons, C6, isoalkanes, <5% nhexane	Consumers	Inhalation	Long-term systemic effects	1131 mg/m3
Hydrocarbons, C6, isoalkanes, <5% nhexane	Consumers	Oral	Long-term systemic effects	1301 mg/kg

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

pentane	Workers	Dermal	Long-term systemic effects	432 mg/kg bw/day
pentane	Workers	Inhalation	Long-term systemic effects	3000 mg/m3
pentane	Consumers	Dermal	Long-term systemic effects	214 mg/kg bw/day
pentane	Consumers	Inhalation	Long-term systemic effects	643 mg/m3
pentane	Consumers	Oral	Long-term systemic effects	214 mg/kg bw/day

#### Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

Substance name	Environmental Compartment	Value
pentane	Water	0,23 mg/l
pentane	Sediment	1,2 mg/kg
pentane	Soil	0,55 mg/kg wet
		weight
pentane	Sewage treatment plant	3,6 mg/l

### 8.2 Exposure controls

#### **Engineering measures**

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex. Use sealed systems as far as possible.

Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits.

Local exhaust ventilation is recommended.

Eye washes and showers for emergency use.

Firewater monitors and deluge systems are recommended.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

General Information

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or for subsequent recycle.

#### Personal protective equipment

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex. The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: 1.0 18.02.2025

SDS Number: 800001013575

Date of last issue: -Print Date 25.02.2025

PPE suppliers.

Eye protection : Wear goggles for use against liquids and gas.

Approved to EU Standard EN166.

If a local risk assessment deems it so then chemical splash goggles may not be required and safety glasses may provide

adequate eye protection.

Hand protection

Remarks : Where hand contact with the product may occur the use of

gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. Longer term protection: Viton. Incidental contact/Splash protection: Nitrile rubber. PVC. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For shortterm/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moistur-

izer is recommended.

Skin and body protection : Chemical resistant gloves/gauntlets, boots, and apron.

Protective clothing approved to EU Standard EN14605.

Respiratory protection : If engineering controls do not maintain airborne concentra-

tions to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing appa-

ratus.

Where air-filtering respirators are suitable, select an appro-

priate combination of mask and filter.

If air-filtering respirators are suitable for conditions of use:

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Select a filter suitable for organic gases and vapours [Type

AX boiling point < 65°C (149°F)] meeting EN14387.

Thermal hazards : Not applicable

## **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical and chemical properties

Physical state : Liquid.

Colour : colourless

Odour : Paraffinic

Odour Threshold : Data not available

Pour point : Typical -150 °C

Melting point/ range Data not available

Boiling point/boiling range : Typical 44 - 62 °C

Flammability

Flammability (solid, gas) : Data not available

Lower explosion limit and upper explosion limit / flammability limit

Upper explosion limit /

Upper flammability limit

: 7,5 %(V)

Lower explosion limit /

Lower flammability limit

1,1 %(V)

Flash point : Typical -43 °C

Method: IP 170

Auto-ignition temperature : 392 °C

Decomposition temperature

Decomposition tempera-

Data not available

ture

pH : Not applicable

Viscosity

Viscosity, dynamic : Data not available

Viscosity, kinematic : Typical 0,41 mm2/s (25 °C)

Method: ASTM D445

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version 1.0

Revision Date: 18.02.2025

SDS Number: 800001013575

Date of last issue: -Print Date 25.02.2025

Typical 0,57 mm2/s (0 °C) Method: ASTM D445

Solubility(ies)

Water solubility : insoluble

Solubility in other solvents : Data not available

Partition coefficient: n-

octanol/water

log Pow: 1,1 - 7,5

Vapour pressure : 16 kPa (0 °C)

33 kPa (20 °C)

115 kPa (50 °C)

Relative density : Data not available

Density : Typical 658 kg/m3 (15 °C)

Method: ASTM D4052

Relative vapour density : 3

Particle characteristics

Particle size : Data not available

9.2 Other information

Explosive properties : In use may form flammable/explosive vapour-air mixture.

Oxidizing properties : Not applicable

Evaporation rate : 9,6

Method: ASTM D 3539, nBuAc=1

1

Method: DIN 53170, di-ethyl ether=1

Conductivity : < 0.09 pS/m at 20 °C

Method: ASTM D-4308 Low conductivity: < 100 pS/m

The conductivity of this material makes it a static accumulator., A liquid is typically considered nonconductive if its con-

ductivity is below 100 pS/m and is considered semi-

conductive if its conductivity is below 10,000 pS/m., A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can greatly influence the

conductivity of a liquid

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Surface tension : Typical 16,8 mN/m, 20 °C, ASTM D-971

Molecular weight : 82 g/mol

### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

#### 10.2 Chemical stability

No hazardous reaction is expected when handled and stored according to provisions Stable under normal conditions of use.

#### 10.3 Possibility of hazardous reactions

Hazardous reactions : Reacts with strong oxidising agents.

#### 10.4 Conditions to avoid

Conditions to avoid : Avoid heat, sparks, open flames and other ignition sources.

In certain circumstances product can ignite due to static elec-

tricity.

#### 10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.

## 10.6 Hazardous decomposition products

Hazardous decomposition products are not expected to form during normal storage.

Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases including carbon monoxide, carbon dioxide, sulphur oxides and unidentified organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

## **SECTION 11: Toxicological information**

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Information on likely routes of : Exposure may occur via inhalation, ingestion, skin absorption,

exposure skin or eye contact, and accidental ingestion.

#### **Acute toxicity**

## **Components:**

### Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Acute oral toxicity : LD 50 (Rat): > 5.000 mg/kg

Remarks: Low toxicity

Based on available data, the classification criteria are not met.

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Acute inhalation toxicity : LC 50 (Rat): > 20 mg/l

Remarks: Low toxicity by inhalation.

Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD 50 (Rabbit): 2.000 mg/kg

Remarks: Low toxicity

Based on available data, the classification criteria are not met.

pentane:

Acute oral toxicity : LD50 (Rat, male and female): > 5.000 mg/kg

Method: OECD Test Guideline 401

Remarks: Based on available data, the classification criteria

are not met.

Acute inhalation toxicity : LC50 (Rat, male and female): > 20 mg/l

Exposure time: 4 h
Test atmosphere: vapour

Method: OECD Test Guideline 403

Remarks: Based on available data, the classification criteria

are not met.

#### Skin corrosion/irritation

#### **Components:**

#### Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Remarks : Causes skin irritation.

pentane:

Species : Rabbit

Method : Test(s) equivalent or similar to OECD Test Guideline 404

Remarks : Slightly irritating to skin.

Insufficient to classify.

#### Serious eye damage/eye irritation

## **Components:**

## Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Remarks : Not irritating to eye.

pentane:

Species : Rabbit

Method : OECD Test Guideline 405

Remarks : Slightly irritating.

Insufficient to classify.

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

#### Respiratory or skin sensitisation

#### **Components:**

#### Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Remarks : Not a sensitiser.

Based on available data, the classification criteria are not met.

pentane:

Species : Guinea pig

Method : OECD Test Guideline 406

Remarks : Based on available data, the classification criteria are not met.

#### Germ cell mutagenicity

### **Components:**

#### **Hydrocarbons, C6, isoalkanes, <5% n-hexane:**

Genotoxicity in vivo : Remarks: Not mutagenic.

Germ cell mutagenicity- As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

pentane:

Genotoxicity in vitro : Method: Test(s) equivalent or similar to OECD Guideline 471

Remarks: Based on available data, the classification criteria

are not met.

Method: Directive 67/548/EEC, Annex V, B.10.

Remarks: Based on available data, the classification criteria

are not met.

Genotoxicity in vivo : Species: Rat

Method: Directive 67/548/EEC, Annex V, B.12.

Remarks: Based on available data, the classification criteria

are not met.

Germ cell mutagenicity- As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

## Carcinogenicity

## **Components:**

#### **Hydrocarbons, C6, isoalkanes, <5% n-hexane:**

Remarks : Tumours produced in animals are not considered relevant to

humans.

Not a carcinogen.

Based on available data, the classification criteria are not met.

Carcinogenicity - Assess- : This product does not meet the criteria for classification in

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

ment categories 1A/1B.

pentane:

Carcinogenicity - Assess-

ment

This product does not meet the criteria for classification in

categories 1A/1B.

Material	GHS/CLP Carcinogenicity Classification
Hydrocarbons, C6, isoal-kanes, <5% n-hexane	No carcinogenicity classification.
pentane	No carcinogenicity classification.
n-Hexane	No carcinogenicity classification.

## Reproductive toxicity

#### **Components:**

Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Effects on fertility

Remarks: Not a developmental toxicant., Does not impair

fertility.

Reproductive toxicity - As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

pentane:

Effects on fertility : Species: Rat

Sex: male and female

Application Route: Inhalation

Method: Equivalent or similar to OECD Test Guideline 416 Remarks: Based on available data, the classification criteria

are not met.

Reproductive toxicity - As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

STOT - single exposure

**Components:** 

Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Remarks : May cause drowsiness or dizziness.

pentane:

Exposure routes : Inhalation

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Target Organs : Central nervous system

Remarks : May cause drowsiness or dizziness.

#### STOT - repeated exposure

#### **Components:**

#### Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Remarks : Based on available data, the classification criteria are not met.

pentane:

Remarks : Based on available data, the classification criteria are not met.

### Repeated dose toxicity

### **Components:**

#### pentane:

Species : Rat, male and female

Application Route : Inhalation Test atmosphere : Gas

Method : OECD Test Guideline 413
Target Organs : No specific target organs noted

## **Aspiration toxicity**

#### **Components:**

## Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.

#### pentane:

Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.

#### 11.2 Information on other hazards

### **Endocrine disrupting properties**

#### **Product:**

Assessment : The substance/mixture does not contain components consid-

ered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at

levels of 0.1% or higher.

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

#### **Further information**

**Product:** 

Remarks : Unless indicated otherwise, the data presented is representa-

tive of the product as a whole, rather than for individual com-

ponent(s).

**Components:** 

Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Remarks : Exposure to very high concentrations of similar materials has

been associated with irregular heart rhythms and cardiac ar-

rest.

Remarks : Classifications by other authorities under varying regulatory

frameworks may exist.

pentane:

Remarks : Classifications by other authorities under varying regulatory

frameworks may exist.

#### **SECTION 12: Ecological information**

## 12.1 Toxicity

#### Components:

Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Toxicity to fish : Remarks: Data not available

Toxicity to daphnia and other :

aquatic invertebrates

Remarks:  $LL/EL/IL50 > 1 \le 10 \text{ mg/l}$ 

Toxicity to algae/aquatic plants : Remarks: Toxic

LC/EC/IC50 > 10 - <= 100 mg/l

Toxicity to microorganisms :

Remarks: Data not available

Toxicity to fish (Chronic tox-

icity)

Remarks: Data not available

Toxicity to daphnia and other :

aquatic invertebrates (Chron-

ic toxicity)

Remarks: Data not available

pentane:

Toxicity to fish : LC50 (Oncorhynchus mykiss (rainbow trout)): 4,26 mg/l

Exposure time: 96 h

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Method: OECD Test Guideline 203

Remarks: Toxic

 $LL/EL/IL50 > 1 \le 10 \text{ mg/l}$ 

Toxicity to daphnia and other :

aquatic invertebrates

EC50 (Daphnia magna (Water flea)): 2,7 mg/l

Exposure time: 48 h

Method: Test(s) equivalent or similar to OECD Guideline 202

Remarks: Toxic

 $LL/EL/IL50 > 1 \le 10 \text{ mg/l}$ 

Toxicity to algae/aquatic plants : EC50 (Scenedesmus capricornutum (fresh water algae)): 10,7

mg/l

Exposure time: 72 h

Method: OECD Test Guideline 201

Remarks: Harmful

LL/EL/IL50 > 10 <= 100 mg/l

Toxicity to microorganisms : NOEL (Tetrahymena pyriformis): 23,7 mg/l

Exposure time: 48 h

Method: Based on quantitative structure-activity relationship

(QSAR) modelling

Remarks: NOEC/NOEL >100 mg/l

Toxicity to fish (Chronic tox-

icity)

NOELR: 6,165 mg/l Exposure time: 28 d

Species: Oncorhynchus mykiss (rainbow trout)

Method: Based on quantitative structure-activity relationship

(QSAR) modelling

Remarks: NOEC/NOEL > 1.0 - <= 10 mg/l

Toxicity to daphnia and other : aquatic invertebrates (Chron-

ic toxicity)

NOELR: 10,76 mg/l Exposure time: 21 d

Species: Daphnia magna (Water flea)

Method: Based on quantitative structure-activity relationship

(QSAR) modelling Remarks: No data available

#### 12.2 Persistence and degradability

#### Components:

Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Biodegradability : Remarks: Readily biodegradable.

Oxidises rapidly by photo-chemical reactions in air.

pentane:

Biodegradability : Biodegradation: 87 %

Exposure time: 28 d

Method: Test(s) equivalent or similar to OECD Guideline 301

F

Remarks: Readily biodegradable.

Oxidises rapidly by photo-chemical reactions in air.

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

#### 12.3 Bioaccumulative potential

#### **Components:**

**Hydrocarbons, C6, isoalkanes, <5% n-hexane:** 

Bioaccumulation : Remarks: Has the potential to bioaccumulate.

pentane:

Bioaccumulation : Species: Pimephales promelas (fathead minnow)

Bioconcentration factor (BCF): 171

Method: Based on quantitative structure-activity relationship

(QSAR) modelling

Remarks: Does not bioaccumulate significantly.

#### 12.4 Mobility in soil

## **Components:**

**Hydrocarbons, C6, isoalkanes, <5% n-hexane:** 

Mobility : Remarks: Floats on water., If it enters soil, it will adsorb to soil

particles and will not be mobile.

pentane:

Mobility : Remarks: Floats on water., If the product enters soil, one or

more constituents will or may be mobile and may contaminate

groundwater.

#### 12.5 Results of PBT and vPvB assessment

### **Components:**

Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Assessment : The substance does not fulfill all screening criteria for persis-

tence, bioaccumulation and toxicity and hence is not consid-

ered to be PBT or vPvB..

pentane:

Assessment : The substance does not fulfill all screening criteria for persis-

tence, bioaccumulation and toxicity and hence is not consid-

ered to be PBT or vPvB..

#### 12.6 Endocrine disrupting properties

#### **Product:**

Assessment : The substance/mixture does not contain components considered to

have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

#### 12.7 Other adverse effects

#### **Product:**

Additional ecological infor-

mation

Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

#### **Components:**

#### Hydrocarbons, C6, isoalkanes, <5% n-hexane:

Additional ecological infor-

mation

: Does not have ozone depletion potential.

pentane:

Additional ecological infor-

mation

In view of the high rate of loss from solution, the product is unlikely

to pose a significant hazard to aquatic life.

## **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

Product

Recover or recycle if possible.

It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal meth-

ods in compliance with applicable regulations.

Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Do not dispose into the environment, in drains or in water

courses.

Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination.

Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

Waste, spills or used product is dangerous waste.

Disposal should be in accordance with applicable regional,

national, and local laws and regulations.

Local regulations may be more stringent than regional or na-

tional requirements and must be complied with.

MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical and attack the standard line and line and the standard line and line and the standard line and lin

nical aspects at controlling pollutions from ships.

Contaminated packaging : Drain container thoroughly.

According to EC No 1907/2006 as amended as at the date of this SDS

## **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

After draining, vent in a safe place away from sparks and fire. Residues may cause an explosion hazard. Do not puncture,

cut or weld uncleaned drums.

Send to drum recoverer or metal reclaimer.

Comply with any local recovery or waste disposal regulations.

## **SECTION 14: Transport information**

#### 14.1 UN number or ID number

 ADR
 : 1268

 RID
 : 1268

 IMDG
 : 1268

 IATA
 : 1268

#### 14.2 UN proper shipping name

ADR : PETROLEUM DISTILLATES, N.O.S.

RID : PETROLEUM DISTILLATES, N.O.S.

IMDG : PETROLEUM DISTILLATES, N.O.S.

(NAPHTHA)

IATA : Petroleum distillates, n.o.s.

## 14.3 Transport hazard class(es)

ADR : 3
RID : 3
IMDG : 3
IATA : 3

## 14.4 Packing group

#### ADR

Packing group : II
Classification Code : F1
Hazard Identification Number : 33
Labels : 3

#### **RID**

Packing group : II
Classification Code : F1
Hazard Identification Number : 33

Packing group : II Labels : 3

14.5 Environmental hazards

**ADR** 

Environmentally hazardous : yes

rid

Environmentally hazardous : yes

**IMDG** 

Marine pollutant : yes

14.6 Special precautions for user

Remarks : Special Precautions: Refer to Section 7, Handling & Storage,

for special precautions which a user needs to be aware of or

needs to comply with in connection with transport.

14.7 Maritime transport in bulk according to IMO instruments

Pollution category : Not applicable
Ship type : Not applicable
Product name : Not applicable

#### **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

REACH - List of substances subject to authorisation (Annex XIV)

Product is not subject to Authorisa-

tion under REACH.

REACH - Candidate List of Substances of Very High

Concern for Authorisation (Article 59).

 This product does not contain substances of very high concern (Regulation (EC) No 1907/2006 (REACH),

Article 57).

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving

dangerous substances.

P5c FLAMMABLE LIQUIDS

E2 ENVIRONMENTAL HAZARDS

Volatile organic compounds : Volatile organic compounds (VOC) content: 100 %

Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

Act No. 350/2011 Coll., on chemical substances and mixtures including related regulations and decrees as amended.

Act No. 201/2012 Coll., on protection of the air, including related regulations and decrees as amended.

Act No. 304/2017 Coll., on road traffic and transport, including related regulations and decrees as amended (ADR).

Act No. 319/2016 Coll., on railways and rail transport, including relating regulations and decrees as amended (RID).

Act No. 541/2020 Coll., on waste, including related regulations and decrees as amended. Act No. 542/2020 Coll., on products with terminated lifetime period including relating regulations and decrees as amended.

Act No. 544/2020 Coll., on waters, including relating regulations and decrees as amended. Act No. 365/2011 Coll., Labor Code, including relating regulations and decrees as amended. Act No. 258/2000 Coll. Public Health Protection, including relating regulations and decrees as

amended. Government Regulation No. 361/2007 Coll., laying down conditions for the protection of health at work.

Product is subject to Prevention of Major Accident (No. 224/2015 Coll.) based on Seveso III directive (2012/18/EU).

#### **Further information**

Training advice : Provide adequate information, instruction and training for op-

erators.

Other information : For Industry guidance and tools on REACH please visit the

CEFIC website at http://cefic.org/Industry-support.

The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not consid-

ered to be PBT or vPvB.

A vertical bar (|) in the left margin indicates an amendment

from the previous version.

This product is classified as R66 / EUH066 (Repeated exposure may cause skin dryness or cracking). The risk relates to the potential for repeated or prolonged dermal contact. The risk arising from contact is solely related to the physicochemical properties of the substance. The risk can therefore be controlled by implementing risk management measures tailored to this specific hazard and included within Section 8 of

the SDS. An exposure scenario is not presented.

Sources of key data used to compile the Safety Data

Sheet

The quoted data are from, but not limited to, one or more sources of information (e.g. toxicological data from Shell Health Services, material suppliers' data, CONCAWE, EU

IUCLID date base, EC 1272 regulation, etc).

SECTION 3	EXPOSURE ESTIMATION	
Section 3.1 - Health		
The ECETOC TRA tool has I indicated.	peen used to estimate workplace exposures unless otherwise	

#### **Section 3.2 - Environment**

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

SECTION 4	GUIDANCE TO CHECK COMPLIANCE WITH THE
	EXPOSURE SCENARIO
0 4 4 11 141	

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects.

Risk Management Measures are based on qualitative risk characterisation.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Estimated workplace exposures are not expected to exceed DNELs when the identified risk management measures are adopted.

#### **Section 4.2 - Environment**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

According to EC No 1907/2006 as amended as at the date of this SDS

regulations.

#### Conditions and measures related to external recovery of waste

External recovery and recycling of waste should comply with applicable local and/or regional regulations.

### SECTION 3 EXPOSURE ESTIMATION

#### Section 3.1 - Health

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

#### **Section 3.2 - Environment**

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

SECTION 4	GUIDANCE TO CHECK COMPLIANCE WITH THE
	EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects.

Risk Management Measures are based on qualitative risk characterisation.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### **Section 4.2 - Environment**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

According to EC No 1907/2006 as amended as at the date of this SDS

SECTION 3	EXPOSURE ESTIMATION	
Section 3.1 - Health		
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.		

According to EC No 1907/2006 as amended as at the date of this SDS

### **SBP 40/65 LNH**

Version Revision Date: SDS Number: Date of last issue: - 1.0 18.02.2025 800001013575 Print Date 25.02.2025

### Section 3.2 - Environment

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

SECTION 4	GUIDANCE TO CHECK COMPLIANCE WITH THE
	EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects.

Risk Management Measures are based on qualitative risk characterisation.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### **Section 4.2 - Environment**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

According to EC No 1907/2006 as amended as at the date of this SDS

# **SBP 40/65 LNH**
