SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name : Ethylene Glycol Industrial Grade

Product code : U1284

Registration number EU : 01-2119456816-28-0001, 01-2119456816-28-0002

Synonyms : Dihydroxy ethane 1,2, Ethane diol 1,2, Ethylene Glycol, Gly-

col, MEG

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- : Chemical intermediate.

stance/Mixture Please refer to section 16 and/or the annexes for the regis-

tered uses under REACH.

Uses advised against : This product must not be used in applications other than the

above without first seeking the advice of the supplier., Do not use in the manufacture or preparation of foods or pharmaceuticals., Keep out of reach of children and pets., Do not use in theatrical fogs or other artificial smoke generator applications.,

Do not use in aircraft deicing applications.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier : Shell Chemicals Europe B.V.

PO Box 2334 3000 CH Rotterdam

Netherlands

Telephone : +31 (0)10 441 5137 / +31 (0)10 441 5191 Telefax : +31 (0)20 716 8316/ +31 (0)20 713 9230

Contact for Safety Data : sccmsds@shell.com

week)

NPIC: 018092166 (office hours only)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Acute toxicity, Category 4, Oral H302: Harmful if swallowed.

Specific target organ toxicity - repeated H373: May cause damage to organs through pro-

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

exposure, Category 2, Kidney longed or repeated exposure.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms

Signal word : Warning

Hazard statements : PHYSICAL HAZARDS:

Not classified as a physical hazard according to CLP

criteria.

HEALTH HAZARDS: H302 Harmful if swallowed.

H373 May cause damage to organs (Kidney) through pro-

longed or repeated exposure.

ENVIRONMENTAL HAZARDS:

Not classified as environmental hazard according to

CLP criteria.

Precautionary statements : Prevention:

P260 Do not breathe dust/ fume/ gas/ mist/ vapours/ spray.

P264 Wash hands thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.

Response:

P301 + P312 IF SWALLOWED: Call a POISON CENTER/

doctor if you feel unwell. P330 Rinse mouth.

P314 Get medical advice/ attention if you feel unwell.

Storage:

No precautionary phrases.

Disposal:

P501 Dispose of contents/ container to an approved waste

disposal plant.

2.3 Other hazards

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Inhalation of vapours or mists may cause irritation to the respiratory system.

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Slightly irritating to respiratory system.

Slightly irritating to the skin. Slightly irritating to the eye.

Vapours may be irritating to the eye.

SECTION 3: Composition/information on ingredients

3.1 Substances

Components

| Chemical name | CAS-No. | Concentration (% w/w) |
|-------------------|-----------|-----------------------|
| | EC-No. | |
| ethanediol | 107-21-1 | 99 - 100 |
| | 203-473-3 | |
| Diethylene glycol | 111-46-6 | 0 - < 1 |
| | 203-872-2 | |

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice : Not expected to be a health hazard when used under normal

conditions.

Protection of first-aiders : When administering first aid, ensure that you are wearing the

appropriate personal protective equipment according to the

incident, injury and surroundings.

If inhaled : Remove to fresh air. If rapid recovery does not occur,

transport to nearest medical facility for additional treatment.

In case of skin contact : Remove contaminated clothing. Flush exposed area with wa-

ter and follow by washing with soap if available.

If persistent irritation occurs, obtain medical attention.

In case of eye contact : Flush eye with copious quantities of water.

Remove contact lenses, if present and easy to do. Continue

rinsing.

If persistent irritation occurs, obtain medical attention.

If swallowed : If swallowed, do not induce vomiting: transport to nearest

medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.

Rinse mouth.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms : Kidney toxicity may be recognized by blood in the urine or

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

increased or decreased urine flow. Other signs and symptoms can include nausea, vomiting, abdominal cramps, diarrhoea, lumbar pain shortly after ingestion, and possibly narcosis and death.

Not considered to be an inhalation hazard under normal conditions of use.

Respiratory irritation signs and symptoms may include a temporary burning sensation of the nose and throat, coughing, and/or difficulty breathing.

No specific hazards under normal use conditions.

Skin irritation signs and symptoms may include a burning sensation, redness, or swelling.

Eye irritation signs and symptoms may include a burning sen-

sation, redness, swelling, and/or blurred vision.

Ingestion may result in nausea, vomiting and/or diarrhoea.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Call a doctor or poison control center for guidance.

Treat symptomatically.

May cause significant renal, respiratory, and CNS toxicity.

May cause significant acidosis.

The preferred treatment is immediate transportation to a medical facility and use of appropriate treatment including possible administration of activated charcoal, gastric lavage and or gastric aspiration. If none of the above are immediately available and a delay of more than one hour is anticipated before such medical attention can be obtained, induction of vomiting may be appropriate using IPECAC syrup (Contraindicated if there are any signs of CNS depression). This should be considered on a case by case basis following specialist advice. Specific other treatments may include ethanol therapy, fomepizole, treatment of acidosis and haemodialysis. Seek specialist advice without delay.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media : Alcohol-resistant foam, water spray or fog. Dry chemical pow-

der, carbon dioxide, sand or earth may be used for small fires

only.

Unsuitable extinguishing

media

Do not use water in a jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during fire-

fighting

Material will not burn unless preheated.

Carbon monoxide may be evolved if incomplete combustion

occurs.

Containers exposed to intense heat from fires should be

cooled with large quantities of water.

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

5.3 Advice for firefighters

Special protective equipment :

for firefighters

Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to

relevant Standards (e.g. Europe: EN469).

Specific extinguishing meth-

ods

Standard procedure for chemical fires.

Further information : Evacuate the area of all non-essential personnel.

Keep adjacent containers cool by spraying with water.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions

Observe all relevant local and international regulations.

Notify authorities if any exposure to the general public or the

environment occurs or is likely to occur.

Local authorities should be advised if significant spillages

cannot be contained.

6.1.1 For non emergency personnel: Avoid contact with skin, eyes and clothing.

6.1.2 For emergency responders:

Avoid contact with skin, eyes and clothing.

6.2 Environmental precautions

Environmental precautions : Prevent from spreading or entering into drains, ditches or riv-

ers by using sand, earth, or other appropriate barriers.

Use appropriate containment to avoid environmental contami-

nation.

Ventilate contaminated area thoroughly.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Contain run-off from residue flush and dispose of properly.

Soak up residue with an absorbent such as clay, sand or other

suitable material.

For small liquid spills (< 1 drum), transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove

contaminated soil and dispose of safely.

For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely

6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Technical measures : Avoid breathing of or direct contact with material. Only use in

well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see

Section 8 of this Safety Data Sheet.

Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this

material.

Ensure that all local regulations regarding handling and stor-

age facilities are followed.

Advice on safe handling : Use local exhaust extraction over processing area.

Handle and open container with care in a well-ventilated area.

Do not empty into drains.

When handling product in drums, safety footwear should be worn and proper handling equipment should be used.

Handling Temperature:

Ambient.

Product Transfer : Keep containers closed when not in use. Do not pressurize

drum containers to empty.

Hygiene measures : Wash hands before eating, drinking, smoking and using the

toilet. Launder contaminated clothing before re-use.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers

Refer to section 15 for any additional specific legislation cov-

ering the packaging and storage of this product.

Further information on stor-

age stability

Tanks must be clean, dry and rust-free.

Keep container tightly closed.

Must be stored in a diked (bunded) well- ventilated area, away from sunlight, ignition sources and other sources of heat.

Cleaning, inspection and maintenance of storage tanks is a specialist operation, which requires the implementation of

strict procedures and precautions.

Drums should be stacked to a maximum of 3 high.

Storage Temperature:

Ambient.

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Packaging material : Suitable material: Stainless steel., Mild steel., Carbon steel

Unsuitable material: Data not available

Container Advice : Containers, even those that have been emptied, can contain

explosive vapours. Do not cut, drill, grind, weld or perform

similar operations on or near containers.

7.3 Specific end use(s)

Specific use(s) : Please refer to section 16 and/or the annexes for the regis-

tered uses under REACH.

Ensure that all local regulations regarding handling and stor-

age facilities are followed.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

| Components | CAS-No. | Value type (Form of exposure) | Control parameters | Basis |
|-------------------|---|-------------------------------|----------------------------------|----------------|
| ethanediol | 107-21-1 | STEL | 40 ppm 104 mg/m3 | 2000/39/EC |
| | Further inform skin, Indicative | | possibility of significant uptak | ce through the |
| ethanediol | | TWA | 20 ppm 52 mg/m3 | 2000/39/EC |
| | Further inform skin, Indicativ | | possibility of significant uptak | ce through the |
| ethanediol | | OELV - 8 hrs (TWA) | 20 ppm 52 mg/m3 | IE OEL |
| | Further information: Substances which have the capacity to penetrate intact skin when they come in contact with it, and be absorbed into the body | | | |
| ethanediol | | OELV - 15 min (STEL) | 40 ppm 104 mg/m3 | IE OEL |
| | Further information: Substances which have the capacity to penetrate intact skin when they come in contact with it, and be absorbed into the body | | | |
| Diethylene glycol | 111-46-6 | OELV - 8 hrs (TWA) | 23 ppm 100 mg/m3 | IE OEL |

Biological occupational exposure limits

No biological limit allocated.

Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

| Substance name | End Use | Exposure routes | Potential health ef- | Value |
|----------------|---------|-----------------|----------------------|-----------|
| | | | fects | |
| ethanediol | Workers | Dermal | Long-term systemic | 106 |
| | | | effects | mg/kg/day |

|------------|-----------|------------|------------------------------|--------------|
| ethanediol | Consumers | Inhalation | Long-term local ef- fects | 7 mg/m3 |

Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

| Substance name | | Environmental Compartment | Value |
|----------------|-----------|---|-------------|
| ethanediol | | | |
| Remarks: | Exposure | assessments have not been presented for the | environment |
| | therefore | PNEC values not required. | |

8.2 Exposure controls

Engineering measures

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex. The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

Eye washes and showers for emergency use.

General Information:

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Personal protective equipment

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex. The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection : If material is handled such that it could be splashed into eyes,

protective eyewear is recommended. Approved to EU Standard EN166.

Hand protection

Remarks : Where hand contact with the product may occur the use of

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: 30.07.2024

SDS Number: 800001001028

Date of last issue: 28.03.2023

Print Date 06.08.2024

gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. Longer term protection: Nitrile rubber gloves. Incidental contact/Splash protection: PVC or neoprene rubber gloves. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

Skin and body protection

Skin protection is not ordinarily required beyond standard work clothes.

It is good practice to wear chemical resistant gloves. Protective clothing approved to EU Standard EN14605.

Respiratory protection

If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus.

Where air-filtering respirators are suitable, select an appropriate combination of mask and filter.

If air-filtering respirators are suitable for conditions of use: Select a filter suitable for the combination of organic gases and vapours and particles meeting EN14387 and EN143 [Filter type A/P for use against certain organic gases and vapours with a boiling point >65°C (149°F) and for use against particles].

Thermal hazards : Not applicable

9.2 Other information

Explosive properties : Not applicable

Oxidizing properties : Not applicable

Evaporation rate : 0,01

Method: ASTM D 3539, nBuAc=1

Conductivity: > 10,000 pS/m

A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can greatly influence the conductivity of a liquid, This material is not expected to be

a static accumulator.

Surface tension : Data not available

Molecular weight : 62 g/mol

SECTION 10: Stability and reactivity

10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

10.2 Chemical stability

No hazardous reaction is expected when handled and stored according to provisions Oxidises on contact with air.

10.3 Possibility of hazardous reactions

Hazardous reactions : None known.

10.4 Conditions to avoid

Conditions to avoid : Extremes of temperature and direct sunlight.

Product cannot ignite due to static electricity.

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.

Strong acids. Strong bases.

10.6 Hazardous decomposition products

Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases including carbon monoxide, carbon dioxide, sulphur oxides and unidentified organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Information on likely routes of:

exposure

Skin and eye contact are the primary routes of exposure although exposure may occur through inhalation or following

accidental ingestion.

Acute toxicity

Components:

ethanediol:

Acute oral toxicity : LD 50 (Rat, male and female): > 2.000 mg/kg

Method: Acceptable non-standard method.

Remarks: Harmful if swallowed.

There is a marked difference in acute oral toxicity between rodents and man, man being more susceptible than rodents. The estimated fatal dose for man is 100 milliliters (1/2 cup). This material has also been shown to be toxic and potentially

lethal by ingestion to cats and dogs.

Acute inhalation toxicity : LC 50 (Rat, male and female): > 2,5 mg/l

Exposure time: 6 h Test atmosphere: Aerosol Method: Literature data

Remarks: LC50 > 1.0 - <= 5.0 mg/l

LC50 greater than near-saturated vapour concentration. Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD 50 (Mouse, male and female): > 2.000 mg/kg

Method: Literature data

Remarks: Based on available data, the classification criteria

are not met.

Diethylene glycol:

Acute oral toxicity : LD 50 (Rat, male and female): > 5.000 mg/kg

Method: Literature data

Remarks: Harmful if swallowed.

|-------------------|--|
| ethanediol | No carcinogenicity classification. |
| Diethylene glycol | No carcinogenicity classification. |

Reproductive toxicity

Components:

ethanediol:

Effects on fertility : Species: Rat

Sex: male and female Application Route: Oral

Method: Literature data

Remarks: Based on available data, the classification criteria

are not met.

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Reproductive toxicity - As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

Diethylene glycol:

Effects on fertility : Species: Mouse

Sex: male and female Application Route: Oral

Method: Acceptable non-standard method.

Remarks: Based on available data, the classification criteria

are not met.

Reproductive toxicity - As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

STOT - single exposure

Components:

ethanediol:

Remarks : Inhalation of vapours or mists may cause irritation to the res-

piratory system.

Based on available data, the classification criteria are not met.

Ingestion may cause drowsiness and dizziness.

Diethylene glycol:

Remarks : Based on available data, the classification criteria are not met.

Inhalation of vapours or mists may cause irritation to the res-

piratory system.

Ingestion may cause drowsiness and dizziness.

STOT - repeated exposure

Components:

ethanediol:

Exposure routes : Oral Target Organs : Kidney

Remarks : May cause damage to organs or organ systems through pro-

longed or repeated exposure.

Diethylene glycol:

Remarks : Based on available data, the classification criteria are not met.

Repeated dose toxicity

Components:

ethanediol:

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Species : Rat, male Application Route : Oral

Method : Test(s) equivalent or similar to OECD Test Guideline 408

Target Organs : Kidney

Diethylene glycol:

Species : Rat, male and female

Application Route : Oral

Method : Acceptable non-standard method.
Target Organs : No specific target organs noted

Species : Dog, male Application Route : Dermal

Method : OECD Test Guideline 410
Target Organs : No specific target organs noted

Aspiration toxicity

Components:

ethanediol:

Based on available data, the classification criteria are not met.

Diethylene glycol:

Based on available data, the classification criteria are not met.

11.2 Information on other hazards

Endocrine disrupting properties

Product:

Assessment : The substance/mixture does not contain components consid-

ered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at

levels of 0.1% or higher.

Further information

Product:

Remarks : Unless indicated otherwise, the data presented is representa-

tive of the product as a whole, rather than for individual com-

ponent(s).

Components:

ethanediol:

Remarks : Classifications by other authorities under varying regulatory

frameworks may exist.

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Diethylene glycol:

Remarks : Classifications by other authorities under varying regulatory

frameworks may exist.

SECTION 12: Ecological information

12.1 Toxicity

Components:

ethanediol:

Toxicity to fish : LC50 (Pimephales promelas (fathead minnow)): 72.860 mg/l

Exposure time: 96 h

Method: Other guideline method. Remarks: Practically non toxic: LC/EC/IC50 > 100 mg/l

Toxicity to daphnia and other :

aquatic invertebrates

EC50 (Daphnia magna (Water flea)): > 100 mg/l

Exposure time: 48 h

Method: OECD Test Guideline 202 Remarks: Practically non toxic: LC/EC/IC50 > 100 mg/l

Toxicity to algae/aquatic plants : EC50 (Pseudokirchneriella subcapitata (algae)): 6.500 -

13.000 mg/l

Exposure time: 96 h

Method: Other guideline method. Remarks: Practically non toxic: LC/EC/IC50 > 100 mg/l

Toxicity to microorganisms : EC20 (Activated sludge, domestic waste): > 1.995 mg/l

Exposure time: 0,5 h

Method: Other guideline method. Remarks: Practically non toxic: LC/EC/IC50 > 100 mg/l

Toxicity to fish (Chronic tox-

icity)

NOEC: 15.380 mg/l Exposure time: 7 d

Species: Pimephales promelas (fathead minnow)

Method: Other guideline method. Remarks: NOEC/NOEL > 100 mg/l

Toxicity to daphnia and other : aquatic invertebrates (Chron-

ic toxicity)

NOEC: 8.590 mg/l Exposure time: 7 d

Species: Chironomus sp. (midge) Method: Other guideline method. Remarks: NOEC/NOEL > 100 mg/l

Diethylene glycol:

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Toxicity to fish : LC50 (Pimephales promelas (fathead minnow)): > 100 mg/l

Exposure time: 96 h Method: Literature data. Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l

Method: Other guideline method.

Toxicity to daphnia and other :

aquatic invertebrates

EC50 (Daphnia magna (Water flea)): > 100 mg/l

Exposure time: 48 h

Method: Other guideline method. Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l

Toxicity to algae/aquatic plants : EC50 (Scenedesmus quadricauda (Green algae)): > 100 mg/l

Exposure time: 72 h

Method: Information given is based on data obtained from

similar substances.

Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l

Toxicity to microorganisms : EC20 (Activated sludge, domestic waste): > 1.000 mg/l

Exposure time: 3 h

Method: OECD Test Guideline 209 Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l

Toxicity to fish (Chronic tox-

icity)

NOEC: > 40 mg/l Exposure time: 28 d

Species: Pimephales promelas (fathead minnow)

Method: Information given is based on data obtained from

similar substances.

Remarks: NOEC/NOEL > 100 mg/l

Toxicity to daphnia and other :

aquatic invertebrates (Chron-

ic toxicity)

NOEC: > 100 mg/l

Species: Ceriodaphnia dubia (Water flea)

Method: Information given is based on data obtained from

similar substances.

Remarks: NOEC/NOEL > 100 mg/l

12.2 Persistence and degradability

Components:

ethanediol:

Biodegradability : Biodegradation: 90 - 100 %

Exposure time: 10 d

Method: OECD Test Guideline 301A Remarks: Readily biodegradable.

Diethylene glycol:

Biodegradability : Biodegradation: 70 - 80 %

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023 6.1 30.07.2024 800001001028 Print Date 06.08.2024

Exposure time: 28 d

Method: OECD Test Guideline 301B Remarks: Inherently biodegradable.

12.3 Bioaccumulative potential

Components:

ethanediol:

Bioaccumulation : Remarks: Does not have the potential to bioaccumulate significant-

ly.

Diethylene glycol:

Bioaccumulation : Remarks: Does not bioaccumulate significantly.

12.4 Mobility in soil

Components:

ethanediol:

Mobility : Remarks: Disperses in water., If product enters soil, one or

more constituents will be highly mobile and may contaminate

groundwater.

Diethylene glycol:

Mobility : Remarks: If the product enters soil, one or more constituents

will or may be mobile and may contaminate groundwater.,

Dissolves in water.

12.5 Results of PBT and vPvB assessment

Components:

ethanediol:

Assessment : The substance does not fulfill all screening criteria for persis-

tence, bioaccumulation and toxicity and hence is not consid-

ered to be PBT or vPvB..

Diethylene glycol:

Assessment : The substance does not fulfill all screening criteria for persis-

tence, bioaccumulation and toxicity and hence is not consid-

ered to be PBT or vPvB..

12.6 Endocrine disrupting properties

Product:

Assessment : The substance/mixture does not contain components considered to

have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: 30.07.2024

SDS Number: 800001001028

Date of last issue: 28.03.2023

Print Date 06.08.2024

Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

12.7 Other adverse effects

Product:

Additional ecological information

Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

Components:

ethanediol:

Additional ecological information

Does not have ozone depletion potential.

Diethylene glycol:

Additional ecological infor-

mation

Data not available

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Recover or recycle if possible.

It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations.

ods in compliance with applicable regulations.

Remove all packaging for recovery or waste disposal. Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination.

Do not dispose into the environment, in drains or in water courses.

Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

Disposal should be in accordance with applicable regional, national, and local laws and regulations.

Local regulations may be more stringent than regional or national requirements and must be complied with.

MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.

Contaminated packaging : Dispose in accordance with prevailing regulations, preferably

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

14.6 Special precautions for user

Remarks : Special Precautions: Refer to Section 7, Handling & Storage,

for special precautions which a user needs to be aware of or

needs to comply with in connection with transport.

14.7 Maritime transport in bulk according to IMO instruments

Pollution category : Z Ship type : 3

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade

Version Revision Date: SDS Number: Date of last issue: 28.03.2023

6.1 30.07.2024 800001001028 Print Date 06.08.2024

Product name : Ethylene glycol

Additional Information: This product may be transported under nitrogen blanketing.

Nitrogen is an odourless and invisible gas. Exposure to nitrogen enriched atmospheres displaces available oxygen which may cause asphyxiation or death. Personnel must observe strict safety precautions when involved with a confined space

entry.

Transport in bulk according to Annex II of Marpol and the IBC

Code

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

REACH - Restrictions on the manufacture, placing on the market and use of certain dangerous substances,

mixtures and articles (Annex XVII)

: Not applicable

REACH - List of substances subject to authorisation

(Annex XIV)

: Product is not subject to Authorisa-

tion under REACH.

REACH - Candidate List of Substances of Very High

Concern for Authorisation (Article 59).

: This product does not contain substances of very high concern (Regulation (EC) No 1907/2006 (REACH),

Article 57).

Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

The Safety, Health and Welfare at Work Acts 2005 & 2010. Chemicals Act 2008 & 2010. Carriage of Dangerous Goods by Road Regulations 2010.

The components of this product are reported in the following inventories:

Further information

Training advice : Provide adequate information, instruction and training for op-

erators

Other information : For Industry guidance and tools on REACH please visit the

CEFIC website at http://cefic.org/Industry-support.

The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not consid-

ered to be PBT or vPvB.

A vertical bar (|) in the left margin indicates an amendment

from the previous version.

This product is classified as R22/H302 Harmful if swallowed. The same control advice applies to all uses of this product and is included in Section 8 of the SDS. An exposure scenario is

not presented.

Sources of key data used to compile the Safety Data

Sheet

The quoted data are from, but not limited to, one or more sources of information (e.g. toxicological data from Shell Health Services, material suppliers' data, CONCAWE, EU

IUCLID date base, EC 1272 regulation, etc).

Classification of the mixture: Classification procedure:

| | Covers use in room size of 58 m3 |
| | Covers use under typical household ventilation. |
| | Covers use at ambient temperatures. |
| Polymer preparations and compounds | Covers concentrations up to 5 % |
| | For each use event, covers amount up to 825 g |
| | covers use up to 0,2 day/year |
| | covers use up to 1 times/day of use |
| | Covers exposure up to 0,5 hours/event |
| | covers skin contact area up to (cm2): 1.900 cm2 |
| | Covers use in room size of 58 m3 |
| · | Covers use under typical household ventilation. |
| | Covers use at ambient temperatures. |

| Section 2.2 | Control of Environmental Exposure | |
|---|-----------------------------------|--|
| No exposure assessment presented for the environment. | | |

| SECTION 3 | EXPOSURE ESTIMATION |
|--|---------------------|
| Section 3.1 - Health | |
| The Consexpo model has been used to estimate consumer exposures unless otherwise | |
| indicated. | |

Section 3.2 - Environment

No exposure assessment presented for the environment.

| SECTION 4 | GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO |
|----------------------|---|
| Section 4.1 - Health | |

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Section 4.2 - Environment

According to EC No 1907/2006 as amended as at the date of this SDS

Ethylene Glycol Industrial Grade
